Introduction

Working to improve the quality of life for everyone in Derby both now and for future generations is the main priority for Derby City Council and its partners and this will be achieved with the aid of the Derby Plan. The Derby Plan identified several areas to work on that will improve life in Derby between now and 2026. Within these areas there are a number of priorities which we will work on that we believe will make the biggest difference to quality life in Derby.

The neighbourhood profiles support the Derby Plan and are laid out under the Derby Plan headings and indicators.¹ They will provide the evidence base for identifying local priorities. The profiles will be used by a wide ranging audience from Neighbourhood Boards to services involved in tackling key problems and those involved in developing the future of the City.

This profile provides a breadth of information about each neighbourhood including: population make up; economic indicators; learning achievement; the overall health of the population; issues of crime and community safety; how people relate to each other and their feelings about the place they live and finally, involvement in cultural activities.

¹ Where no data around a specific indicator is available at ward level a proxy measure has been included.

Key Messages

This section must be read in conjunction with the full profile for a detailed overview.

Key policy messages uses the data and provides a summary of areas within the ward which are worse than the City as well as areas where there is “room for improvement”. In some areas numbers are small and a handful of incidents maybe the difference between being worse than the Derby average rather than comparable.

These key policy messages do not reflect overall community concerns and neighbourhood priorities, levels of community impact, physical and psychological harm, cost and the resources available to address them.

These areas will be added to key neighbourhood messages and will be completed by neighbourhood mangers and neighbourhood boards. They will provide a chance for comparison between what the data and the neighbourhoods are saying.

A Thriving Sustainable Economy	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
New business starts	
More hi-tech businesses	
Low numbers employed in Hi-tech industries.	
More use of shopping, leisure and tourist facilities	
	Create a thriving and vibrant Spondon
A better built and natural environment	
	Improve highways and transport in Spondon
More people with jobs	
Less carbon emissions from industry and transport	
Traffic congestion	Improve the environment in Spondon
More good quality and affordable housing	

Achieving their Learning Potential	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
More adults learning	
Better results in primary schools	
Attainment	
Spondon has a NEET figure slightly higher than the city average	
More qualifications among adults	

Good Health and Well-Being	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
More people living longer in better health	
Life expectancy for females is significantly less than average for the city. The proportion of children immunised against Diphtheria, Tetanus, Polio and Hib is significantly fewer than average While not significantly, there are higher than average admissions due to substance misuse in Spondon.	Create a healthier Spondon community
Better health at work	
Better mental health and well-being	
More choice and influence over services.	

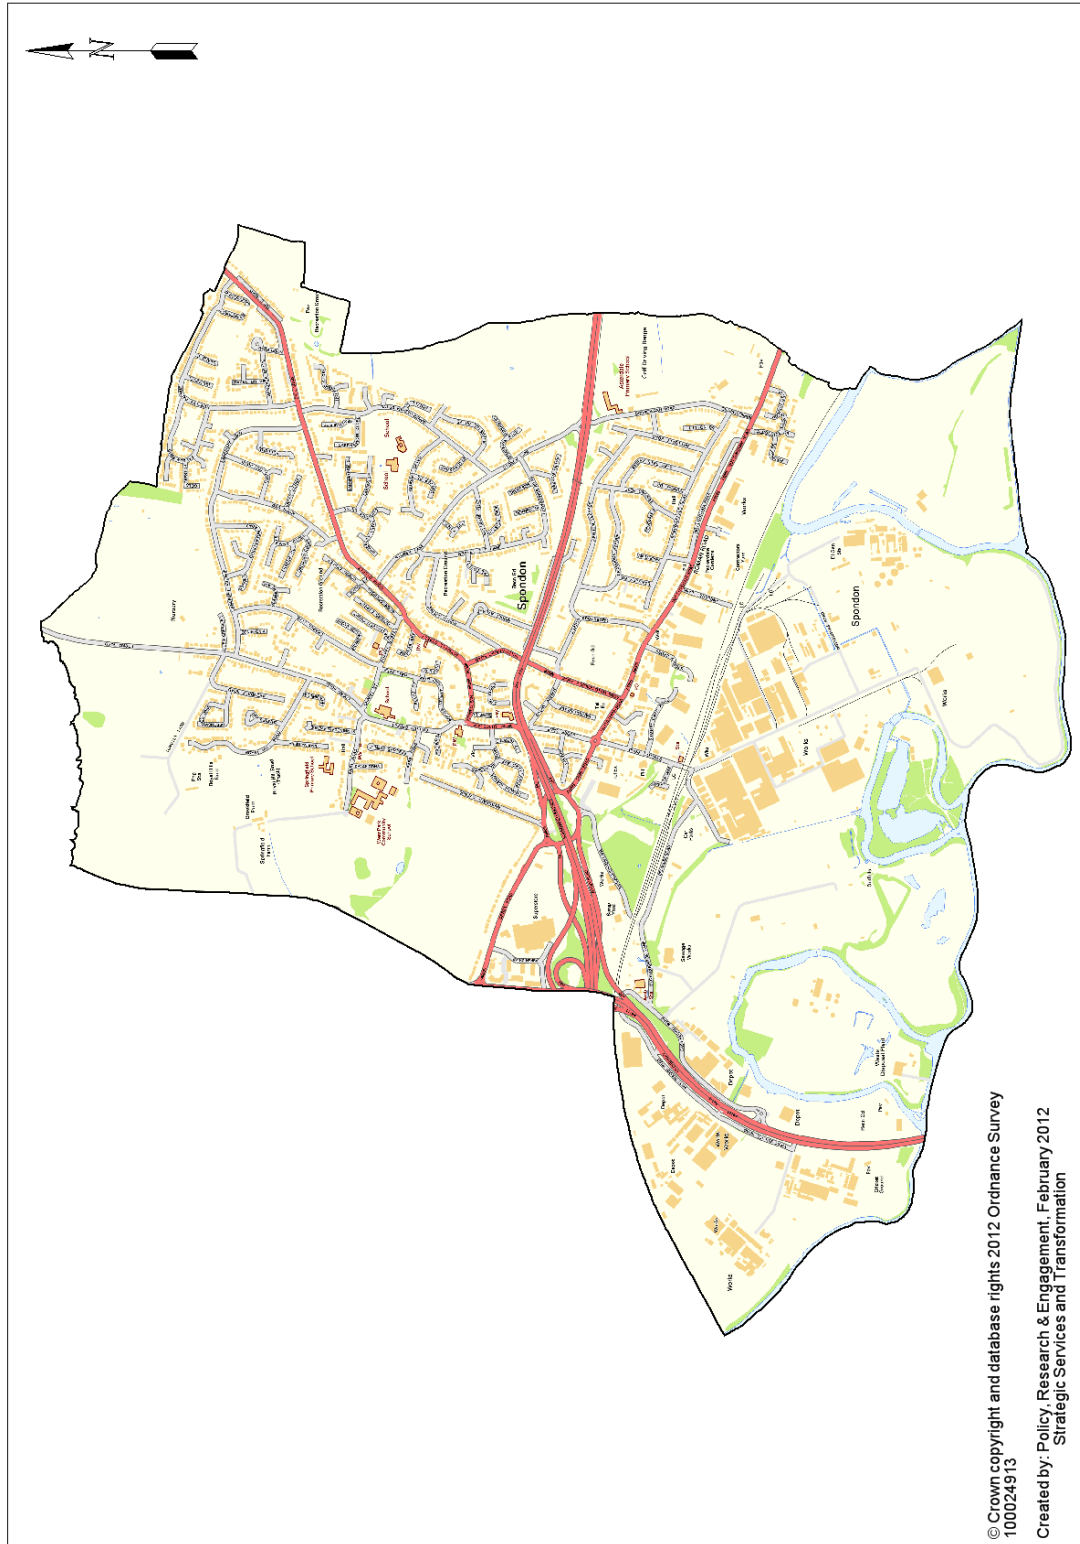

Being Safe and Feeling Safe	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
Less harm caused by alcohol	
Less harm and injuries to vulnerable children and adults	
Less fear of crime and anti-social behaviour	
	Improve community safety in Spondon
Less crime	
	Improve community safety in Spondon

A Strong Community	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
More people volunteering	
A lower rate of residents giving unpaid help	
More people influencing local decisions	
Lower percentage involved in decision making groups.	Improve Community Engagement and Empowerment in Spondon
More people feel they belong to their neighbourhood	
More people feel that people from different backgrounds get on well together	
Fewer people felt that their neighbourhood was a place where different types of people got on well together.	
Less household carbon emissions	

An Active Cultural Life	
Key Messages to Inform Policy	Neighbourhood Priorities – 2012/13
More people taking part in cultural activities	
<p>Lower rate of people who have attended a museum or art gallery in the last 12 months when compared to the city figure.</p> <p>Lower than average percentage of book loans to children from Spondon library.</p>	
More people taking part in physical activities	
<p>The proportion of year 4 students attending schools within Spondon and achieving 7 hours of moderate physical activity a week is slightly below average.</p> <p>Lower than Derby average gym membership.</p>	

Ward Map

Figure 1: Map of Spondon ward. Please refer to this when using the maps in other sections.

General Ward Description²

Spondon is situated to the east of the city centre and covers approximately 797 hectares. It is bordered by the wards of Chaddesden to the west, Alvaston to the south and the administrative area of Erewash Borough Council to the north and east.

The neighbourhood is divided by the A52 which runs from east to west and forms two distinct areas, the low density Spondon village area to the north and the heavily industrialised southern area. Access is predominantly along the A52 and Nottingham Road, whilst Church Road / Locko Road and Moor Street / Dale Road are important routes through the area.

Like many of the more mature suburbs within the city, Spondon has grown from a rural village to a substantial residential suburb of Derby. The historic core of the village is centred on St Werburgh's Church and the conservation area. The village expanded in the inter war period along Moor Street and Willowcroft Road to form what is the traditional village area of the ward.

At the same time, the Celanese works to the south of the Derby to Nottingham railway line were expanding. The residential area between the A52 and Nottingham Road was largely developed in the late 1940s and into the 1950s much of it as an area of housing for workers at the Celanese works. The village was incorporated into the Borough of Derby in 1968. In recent years, housing development has been concentrated to the south of Nottingham Road on former business and industrial sites.

Spondon district centre provides a good range of shops and services and has a low vacancy rate. The ward also contains a large Asda Walmart superstore, which is one of the most significant food stores within the city.

The industrialised southern section of the ward accommodates businesses such as Celanese Acetate Ltd, the Severn Trent sewage works and Rolls-Royce Marine, located on Raynesway. There are also a range of other business uses located along the Raynesway corridor. It has been reported that the Celanese works will be gradually decommissioned in the coming years. This may provide opportunities to regenerate this area of the ward.

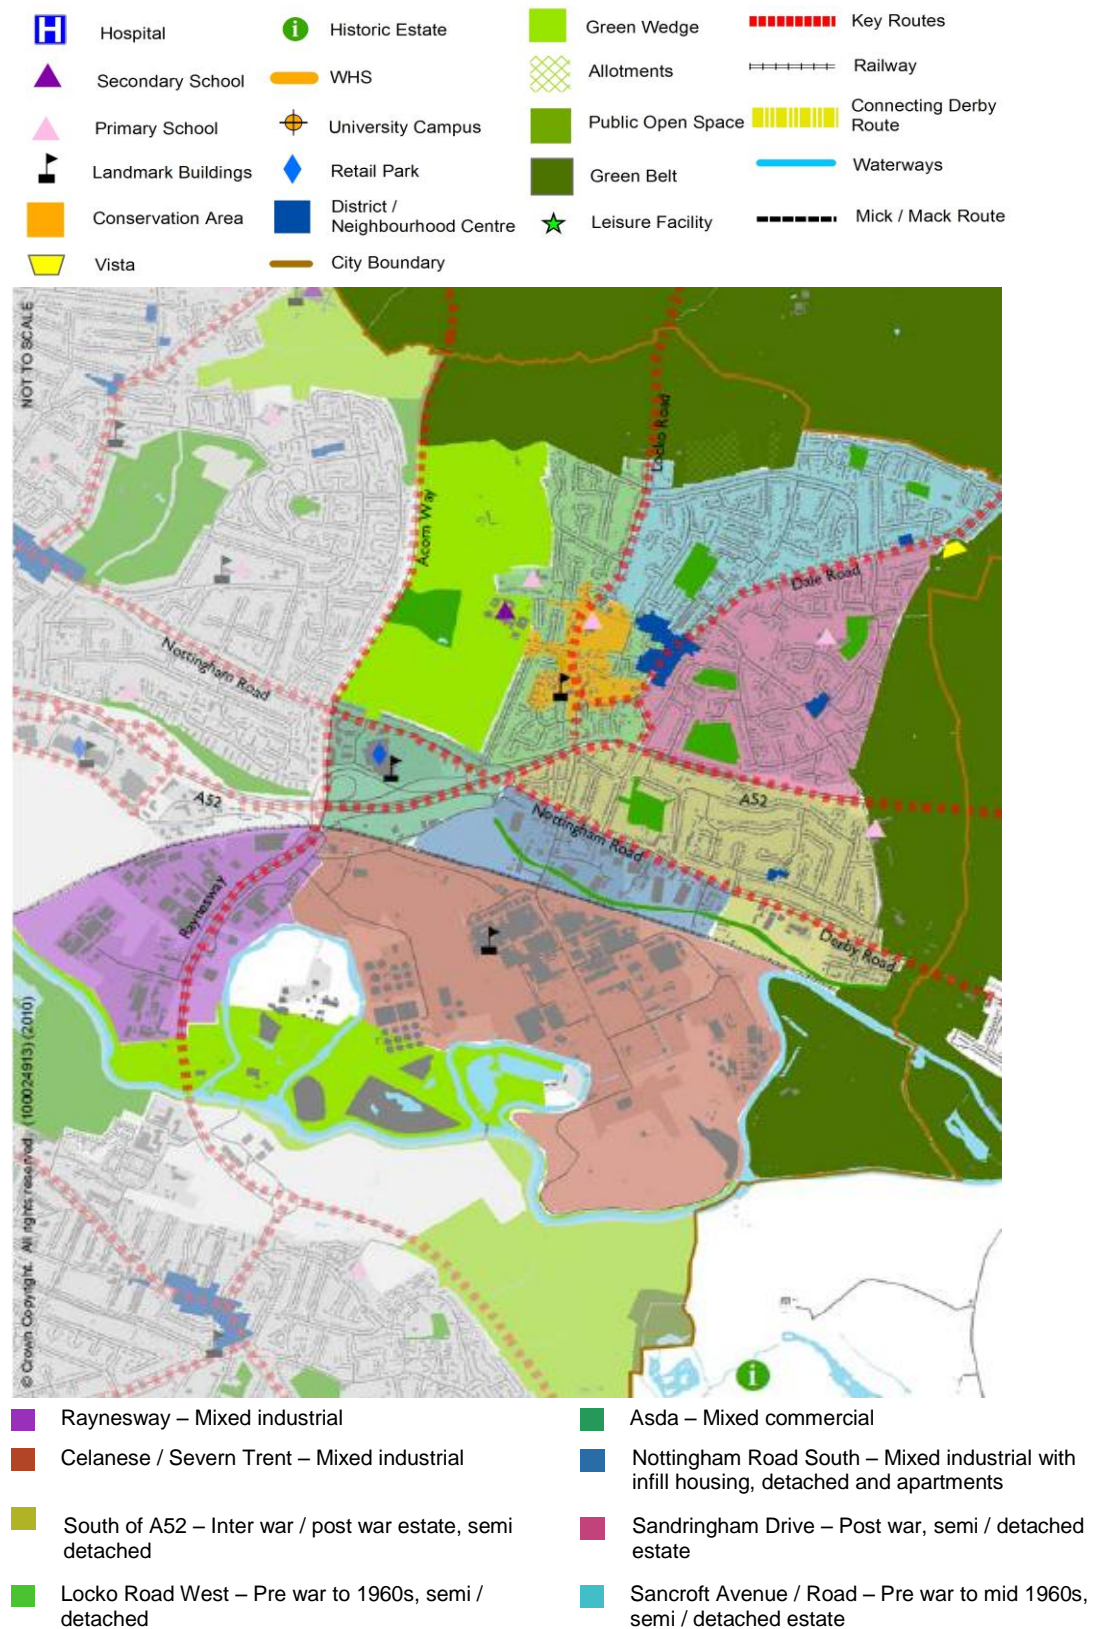

There is a range of open spaces within the neighbourhood, including Brunswood Close Recreation Ground, Gravel Pit Lane Recreation Ground and the Dale Road public open space. There are also substantial areas of green wedge, helping to define Spondon from the surrounding wards of Chaddesden to the west and Alvaston to the south. There are approximately 92 hectares of green belt in the east of the ward and a further 55 hectares in the north, defining the outer edge of the city and helping to stop the convergence of Derby and Nottingham.

Beyond the city boundary to the east, the landscape quickly changes from the suburban character of Spondon to lowland village farmland surrounding villages such as Borrowash and Elvaston. To the north of the ward the landscape is characterised by estate farmland, including the Locko estate.

² Local Development Framework - Neighbourhood Overview – Spatial and Transport Planning, DERBY CITY COUNCIL (DCC)

Research and Intelligence Team, Policy, Research and Engagement Division, Chief Executive's Office. For more information please contact Richard Brett – richard.brett@derby.gov.uk – 01332 643478

Figure 2: Local Development Framework Ward Character Map³

³ The map is an indication of the extent of different townscape character areas within the ward. It is based on draft assessments completed by the Spatial Planning team as part of work on the Core Strategy. Boundaries are purely indicative and descriptions are broad brush based on the overriding character of an area.

The historic centre of Spondon is designated as a conservation area and also contains a scheduled ancient monument. Notable listed buildings within the conservation area include, the Church of St Werburgh's, the Old Farm on Church Hill and the Vicarage on Church Street to name a few.

A number of sites have been identified that may have the potential to accommodate new housing in and around the Spondon area. Land to the east of the ward within the green belt and land within the Spondon-Chaddesden green wedge have been promoted by developers as appropriate sites for new housing. It is also likely that there will be further opportunities to recycle obsolete employment land within the area for alternative uses or new employment uses in the future.

Although there are large areas of employment uses within the ward, the proportion of residents working within the city is below average⁴. The proportion of residents travelling to work by car and van is subsequently above average. The increasing dominance of journey to work by private motor vehicles has influenced the level of congestion along the A52 and at specific congestion hotspots throughout the area such as the intersection of the A52 and Raynesway.

⁴ 2001 Census – this will be available for 2011 at a later date

A Classification Of Residential Neighbourhoods (ACORN)

The following are ACORN generic definitions which relate to table 1 below:

ACORN is a segmentation of the UK's population. It segments small neighbourhoods, postcodes, or consumer households into 5 Categories, 17 Groups and 56 Types. By analysing significant social factors and population behaviour, it provides precise information and in-depth understanding of the different types of people in every part of the UK.⁵

Category One – “Wealthy Achievers”

This is made up of three groups. Group A, “Wealthy Executives” and these are some of the most affluent people in the UK living in wealthy high status suburban, rural and semi-rural areas of the country. Group B are the “Affluent Greys” and these people tend to be older empty nesters and retired couples. Many live in rural towns and villages, often in areas where tourism is important. Group C are “Flourishing Families” and these are wealthy families with mortgages. They live in established suburbs and new housing developments around commuter towns.

Category Two - “Urban Prosperity”

This is also made up of three groups. Group D, “Prosperous Professionals” are the most prosperous people living in our main cities. They are very well educated and tend to be employed in senior managerial and professional occupations. Group E, the “Educated Urbanites” are young people who are highly qualified. The majority live in flats in our major cities. Most are in professional and managerial roles and many are working hard to further their careers. Group F are the “Aspiring Singles” and are young and live in urban or suburban locations, frequently around London. There are large numbers of both students and well qualified young people who have recently finished their studies and started working.

Category Three - “Comfortably Off”

This is made up of four categories. Group G; “Starting Out” are young adults, many just starting out on their careers. They are in their twenties and early thirties. There are a lot of students and young singles in their first jobs, as well as young couples and some young families with children under five. Group H – “Secure Families” comprises home-owning families living comfortably in stable areas in suburban and semi-rural locations. They mainly live in three bedroom semi-detached homes. Families might include young children, teenagers or even young adults who have not yet left home. Group I; “Settled Suburbia” are more established communities that are made up of empty nesters and retired older couples. Group J are the “Prudent Pensioners” and these are comfortably-off retired people found in many seaside towns and elsewhere around the country. There are many over 75s as well as younger retired. A lot of the households are pensioner couples or singles.

Category Four - “Moderate Means”

This is made up of three categories. Group K “Asian Communities” which are urban areas where the concentration of Asian families is a key characteristic. These young families live in the terraced streets of many major cities and there are lots of children in these families,

⁵ CACI ACORN User Guide

which also feature the highest levels of children under the age of five. Group L are “Post-Industrial Families.” These would have been traditional blue-collar areas but with the decline of heavy industry, people are quite likely to work in office or clerical jobs and in shops. Most households are traditional families with school age children. Group M “Blue Collar Roots” are communities where most employment is in traditional blue collar occupations. Families and retired people predominate with some young singles and single parents.

Category Five - “Hard Pressed”

This is made up of four categories. Group N; “Struggling Families” are low income families living on traditional low-rise estates. Some have bought their council houses but most continue to rent. Group O; “Burdened Singles” is an urban group that is characterised by high numbers of single adults. These include single pensioners, young singles and lone parents. Group P; “High Rise Hardship” are communities which have very high numbers of older residents, especially over 65s. There are very few traditional families and middle aged people. There are also fewer children in this group overall, although some areas contain high numbers of single parents with children under 5. Group Q is “Inner City Adversity” and these are densely populated urban areas with a young multi-ethnic population. Households are typically young singles and young families, often single parent.

Table 1: Percentage of Spondon Residents per ACORN Group compared to Derby

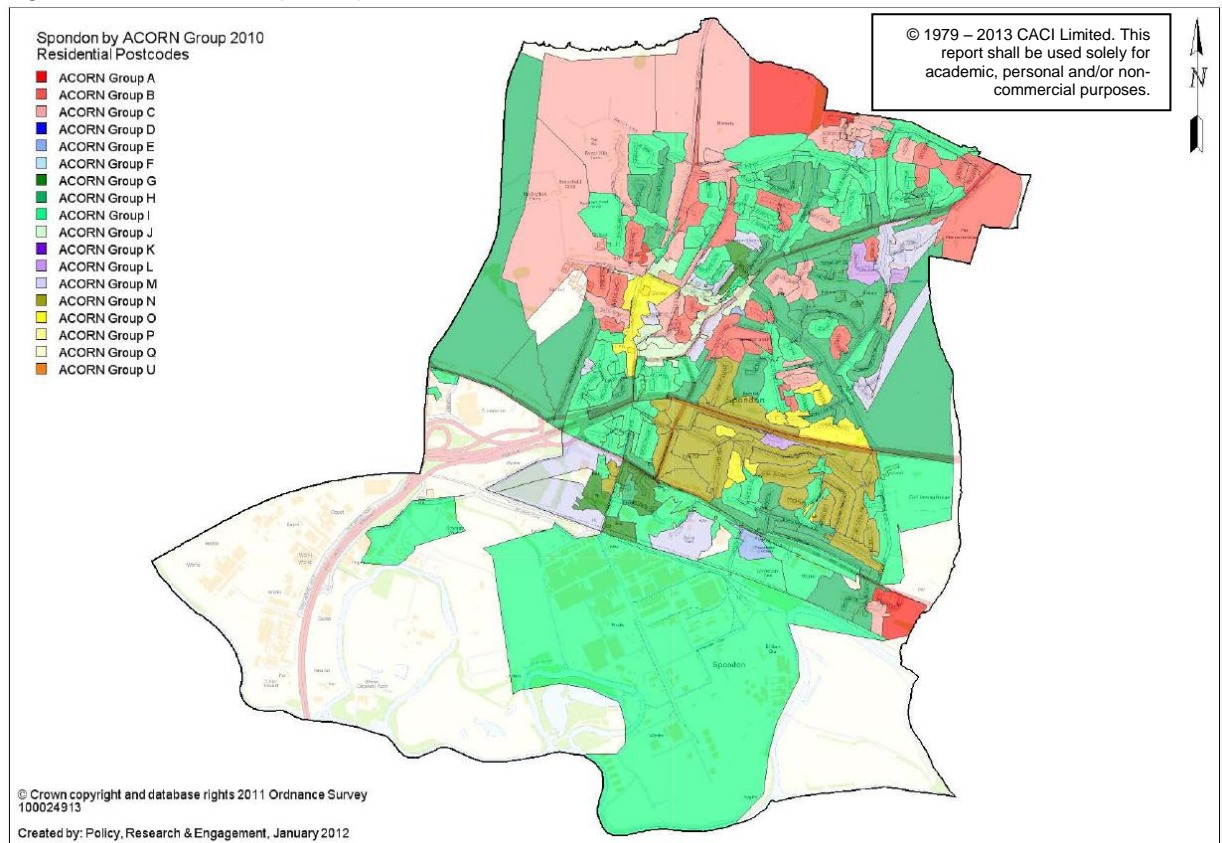

ACORN Categories	ACORN Group	Derby Population	Percentage of Residents in Spondon
Wealthy Achievers	Group A – Wealthy Executives	7.3	1.1
	Group B - Affluent Greys	6.2	7.7
	Group C – Flourishing Families	8.3	10.9
Urban Prosperity	Group D – Prosperous Professionals	0.5	0.0
	Group E - Educated Urbanites	2.1	1.4
	Group F – Aspiring Singles	1.3	0.1
Comfortably Off	Group G – Starting Out	5.3	2.0
	Group H – Secure Families	17.6	25.3
	Group I – Settled Suburbia	8.1	25.5
	Group J – Prudent Pensioners	1.3	1.5
Moderate Means	Group K - Asian Communities	5.1	0.0
	Group L – Post-Industrial Families	1.3	1.8
	Group M – Blue Collar Roots	8.1	5.4
Hard Pressed	Group N – Struggling Families	19.7	14.1
	Group O – Burdened Singles	4.2	3.1
	Group P – High Rise Hardship	2.1	0.0
	Group Q - Inner City Adversity	0.0	0.0
	Group U - Unclassified	1.4	0.2
		100	100

Spondon has a higher percentage of residents than the city in the “comfortable off” categories Groups H; “secure families” and I; “settled suburbia”. These tend to be resident in the north east of the ward around Dale Road and in the centre running out to the east along the Nottingham Road.

It also has more than the Derby average of those in Groups B; “affluent greys” and C; “flourishing families” with these being located in scattered pockets to the north of the ward.

Spondon has a lower percentage of residents than the city in the “urban prosperity”, “moderate means” and “hard pressed” categories.

Figure 3: ACORN map of Spondon

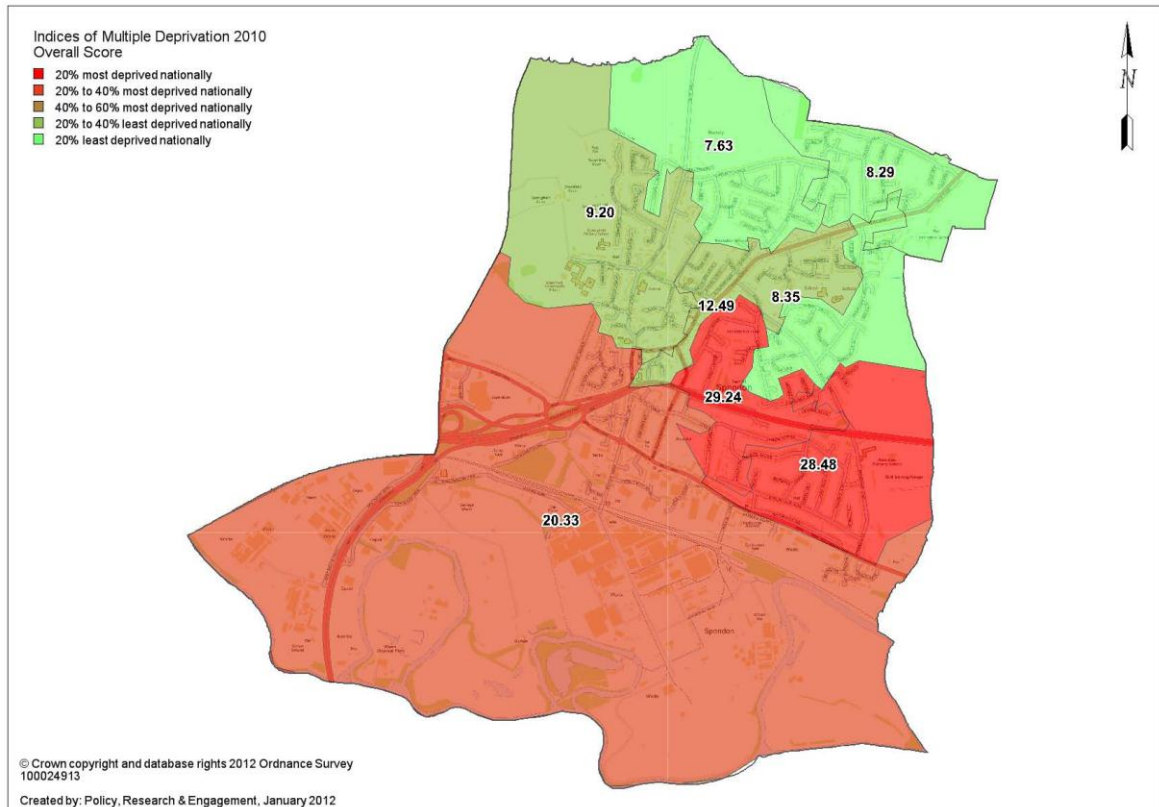

Indices of Deprivation (IMD) 2010 Overall Score

The Index of Multiple Deprivation combines a number of indicators covering a range of economic, social and housing issues, into a single deprivation score for each Lower Super Output Area (LSOA) in England. This allows each area to be ranked relative to one another according to their level of deprivation.

Two LSOA's in Spondon are in the most deprived 20% nationally. These LSOA's are in the East of the ward; off of the A52 around Arnhem Terrace and the Recreation Ground.

Figure 4: Indices of Deprivation 2010 Overall Score Map

Ward Demographics

The 2011 Census puts Spondon's resident population at 12,377, an increase of 3.68% on the 2001 Census figure.

Of these, around 51.0% are female and 49.0% are male compared to a city split of 50.5% female and 49.5% male.

Between 2001 and 2011, Spondon's population density has increased from 1,500 people per square kilometre to 1,553. This compares to a city average of 3,188 people per square kilometre.

Table 2: Population Density

	Population Estimate	Area (Hectares)	Gross Pop. Density (per sq Km)
2001 Census	11,938	7.97	1,499.62
2011 Census	12,377	7.97	1,552.93
City total	248,752	78.03	3,187.86

Spondon has a considerably higher percentage of residents above working age than the city average.

Figure 5: Comparison of Age Categories in Spondon and Derby⁶

⁶ Census 2011. Copyright@ONS.gov.uk

General Fertility Rate⁷

The birth rate in Spondon is lower than that of the city figure.

Table 3: Spondon 2010 fertility rate compared to Derby

	Denominator	Numerator	Birth rate per 1,000 female population aged 15-44	95% CI	
	Female population aged 15-44	Live births to females aged 11-49		RateLL	RateUL
Spondon	2,286	132	57.7	48.2	67.3
Derby	53,316	3,540	66.4	64.0	68.2

Ethnicity⁸

Spondon's population is considerably less ethnically diverse than Derby as a whole as can be seen from the table below.

Table 4: Number and Percentage of Spondon and Derby residents by ethnicity

	Spondon Percentage	Derby Percentage
White: British	94.6	75.3
White: Irish	0.6	0.9
White: Gypsy or Irish Traveller	0.1	0.1
White: Other White	1.1	3.9
Mixed: White and Black Caribbean	0.8	1.6
Mixed: White and Black African	0.1	0.2
Mixed: White and Asian	0.3	0.7
Mixed: Other Mixed	0.3	0.4
Asian / Asian British: Indian	0.5	4.4
Asian / Asian British: Pakistani	0.1	5.9

A Thriving, Sustainable Economy

Introduction

Local Enterprise Partnerships (LEPs) are led by local authorities and businesses across economic areas. They provide the vision, knowledge and strategic leadership needed to drive sustainable private sector growth and job creation in their area. There is a LEP for Derby, Derbyshire, Nottingham and Nottinghamshire. At a local level, in 2010 the Council launched a £10 million Regeneration Fund to support the delivery of new high quality commercial development to establish Derby as a 21st Century investment location.

Infrastructure

Public Transport¹¹

Both the A52 and Nottingham Road corridors serve the Spondon area, providing direct access to the city centre and suburban periphery and Nottingham beyond. Routes serving Spondon operating along these corridors include:

Nottingham Road - Route Destination Frequency (minutes)

4 Nottingham (20)
9 Borrowwash (60)
19 Spondon (60)
20 Chaddesden (10)
22 Oakwood (15)
24 Oakwood (15)
26 Oakwood (10)
BC Ilkeston / Heanor (30)
Indigo Nottingham (20)

A52 - Route Destination Frequency (minutes)

Sfb Spondon (10)
Sfr Spondon (10)
Red Arrow Nottingham (10)
Transpeak Nottingham/Manchester (60)
Ilkeston Flyer (20)
X17 Borrowwash (30)

Bus operators have identified that there are congestion problems along Chapel Street, Sitwell Street and Willowcroft Road within the area that impact upon journeys originating from the area. Congestion at the junction of the A52 with Pentagon island in Derwent ward significantly affects bus services from Spondon,

¹¹ Highways and Transport, DCC

Spondon also has a railway station however services are infrequent.

Cycle Routes

Route 66 passes through the area, linking the area to Chaddesden and Alvaston. It is an orbital route around the city and forms parts of the National Cycle Network.

Job Centre Plus

There are three Job Centre Plus offices in the city; on Gower Street, Becket Street and Normanton Road and all of these are in Arboretum Ward.

Parks

There is a range of open spaces within the neighbourhood, including Brunswood Close Recreation Ground, Gravel Pit Lane Recreation Ground and the Dale Road public open space.

Housing Offices

There is no Derby Homes housing office located within the ward.

Neighbourhood Centres/Shopping Centres

The centre is anchored by two small Co-op supermarkets with a range of other convenience, comparison and service uses. Other uses include a Post Office, three social clubs and medical centre.

There are also three neighbourhood centres within the ward located on Borrowfield Road, Sandringham Drive and Dale Road.

Childcare Places ¹²

Data has not been included on registered places because the recording system is being developed due to the new Early Years Foundation Stage coming into place in September. This should be available for future profile updates

¹² Families Information Service, Children and Young People (CYP) Research and Intelligence Team, Policy, Research and Engagement Division, Chief Executive's Office. For more information please contact Richard Brett – richard.brett@derby.gov.uk – 01332 643478

Table 5: Childcare Institutions¹³ in Spondon and Derby

Type of Institution	Institutions in Ward	Institutions in Derby

Derby Plan

New Business Starts

This will be measured via the Office for National Statistics (ONS) but data is available only at a city level.

Number of Businesses

There are 495 businesses in Spondon,¹⁴ the sixth highest of any of the seventeen wards in Derby.

BankSearch New Business Start Ups

The number of new business start-ups in Spondon increased in 2011.

Table 6: Number of New Business Start Ups¹⁵ in Spondon for 2008, 2009, 2010 and 2011

2008	2009	2010	2011	2008- 2011
77	66	62	89	√

¹³ This gives only Ofsted registered childcare settings although there are non-registered crèches and pre-schools in Derby

¹⁴ EMDA database

¹⁵ Information created by BankSearch Information Consultancy Ltd.

Hi-tech Businesses

This will be measured via Annual Business Inquiry and available only at city level.

According to the 2010 Business Register and Employment Survey (BRES)¹⁶ there are 4,174 people employed in Derby in hi-tech and medium-tech industries¹⁷. Of these 28 are located in Spondon.

More Use of Shopping, Leisure and Tourist Facilities¹⁸

This will be measured only at city level.

Neighbourhood Centres/Shopping Centres

Spondon district centre is the second highest ranking district centre in Derby in the 2008 MHE UK Shopping Index climbing significantly since the 2003/04 Index. The centre is anchored by two small Co-op supermarkets. Other convenience uses include an off licence, a newsagents and a bakery. Comparison uses comprise an electronics shop, car parts shop, health food shop, furniture shop, clothes shop, florists, opticians, pharmacy, shoe shop, pet shop, hardware store, a book shop and a carpet shop. Service uses include banks, hairdressers, a beauty salon and travel agency. Other uses include a Post Office, three social clubs and medical centre.

The centre is relatively underserved in terms of parking.

There are also three neighbourhood centres within the ward located on Borrowfield Road, Sandringham Drive and Dale Road.

Figure 8: Break down of Use Class for Spondon District Centre May 2011¹⁹

* Sui Generis: a use on its own for which any change of use will require planning permission

** Other: includes offices and general industry

A Better Built and Natural Environment

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

¹⁶ Source: ONS Crown Copyright Reserved [from NOMIS on 17 April 2012]

¹⁷ See appendix 5 for a list of BRES hi-tech and medium-tech industries

¹⁸ Leisure Facilities are covered in the Active, Cultural Life section

¹⁹ DCC Spatial and Transport Planning

CSP Survey 2008 found that the percentage of residents very or fairly satisfied with their neighbourhood in Spondon was higher than Derby.

Environmental Crimes²⁰

Calls to Derby Direct²¹ concerning abandoned vehicles, dog fouling, fly tipping, graffiti, litter and needles in Spondon are amongst the lowest of all wards.

Indices of Multiple Deprivation 2010 - The Living Environment

Four indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

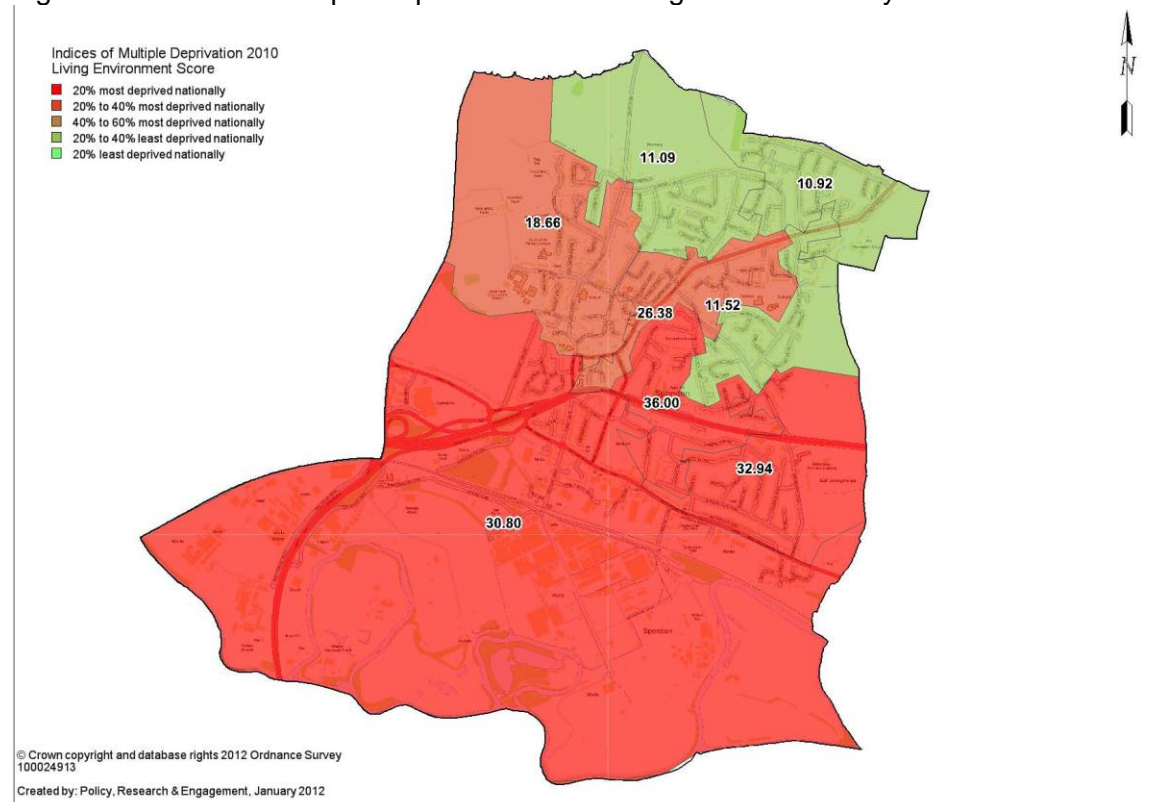

- Housing in Poor Condition
- Houses without Central Heating
- Air Quality
- Road Traffic Accidents.

Derby is ranked the 46th most deprived local authority out of 326 in the Living Environment domain. Spondon is amongst the 20% to 40% most deprived wards in the country and is ranked the 11th most deprived of all Derby wards.

Three LSOA's in Spondon are in the most deprived 20% nationally.

These three LSOA's are in the South of the ward and are around the A52/Borrowwash by-pass, Nottingham Road and Celanese Road.

Figure 9: Indices of Multiple Deprivation 2010 Living Environment by LSOA

²⁰ Future neighbourhood profiles will use the new Lagan Customer Relationship Management (CRM) system which records these transactions and will be able to take advantage of more current data

²¹ 1 April 2010 to 23 February 2011

More People with Jobs

This will be measured via National Online Manpower Information System (NOMIS, part of the ONS providing labour market statistics) dealing with Annual Population Survey and will not be available at Ward level.

Employment²²

The proportion of working age residents of Spondon working within the city is below the city wide average. The proportion of residents working in Erewash is noticeably higher than the average, whilst the proportion of residents working in Nottingham, Amber Valley and North West Leicestershire is also higher than average.

Job Seekers Allowance (JSA) Claimants²³

Spondon had 211 JSA claimants in November 2011, considerably lower than the Derby average.

Spondon has a figure lower than the city in JSA claimant areas; males, females, those aged 24 and under and aged 25 to 59.

The figure for those aged 60 plus²⁴ is comparable to Derby.

Indices of Multiple Deprivation 2010 - Employment Deprivation Domain

Seven indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- Claimants of Jobseeker's Allowance
- Claimants of Incapacity Benefit
- Claimants of Severe Disablement Allowance
- Employment and Support Allowance
- Participants for New Deal for under 25's
- Participants in New deal for 25+
- Participants for New Deal for Lone Parents.

Derby is ranked the 82nd most deprived local authority out of 326 in the Employment domain. Spondon is among the 40% to 60% most deprived wards in the country and is ranked the 12th least deprived of all Derby wards.

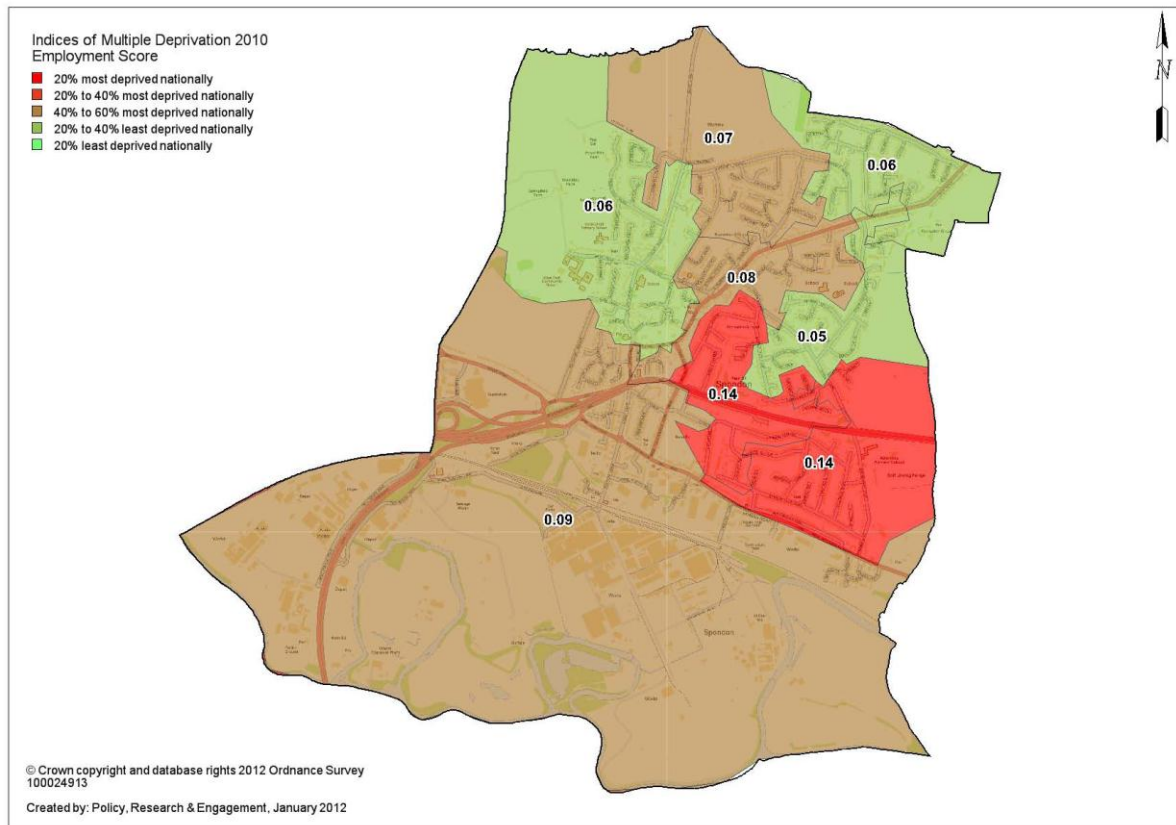

Two LSOA's in Spondon are in the most deprived 20% nationally. These LSOA's are in the East of the ward; off of the A52 around Arnhem Terrace and the Recreation Ground (see over).

²² 2001 Census – this will be available for 2011 at a later date

²³ NOMIS download 06/01/12

²⁴ Very low numbers

Figure 10: Indices of Multiple Deprivation 2010 Employment Domain by LSOA

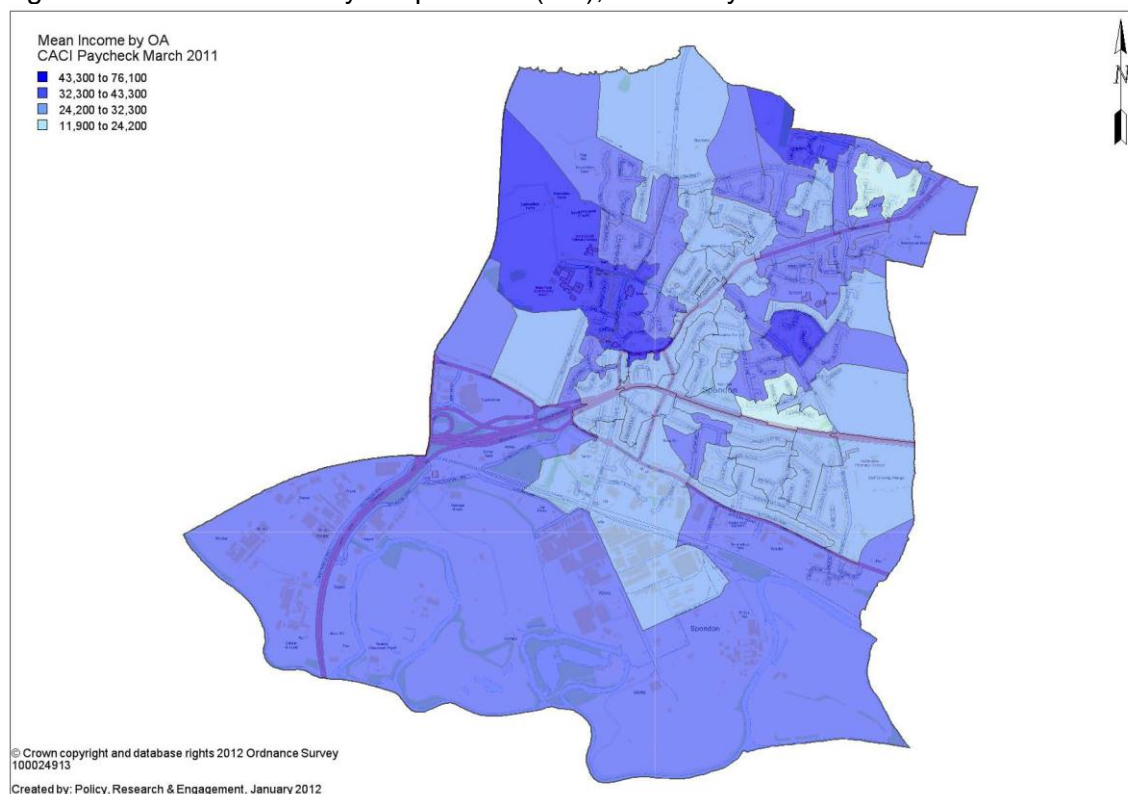

Income

Spondon’s mean annual income is slightly higher than that of the city average but slightly lower than that of the East Midlands average.

There are however pockets of lower annual income in the north east of the ward around Dale Road/Huntley Avenue and Greenfields Avenue and to the east in the roads off of Ladybower Road (see over).

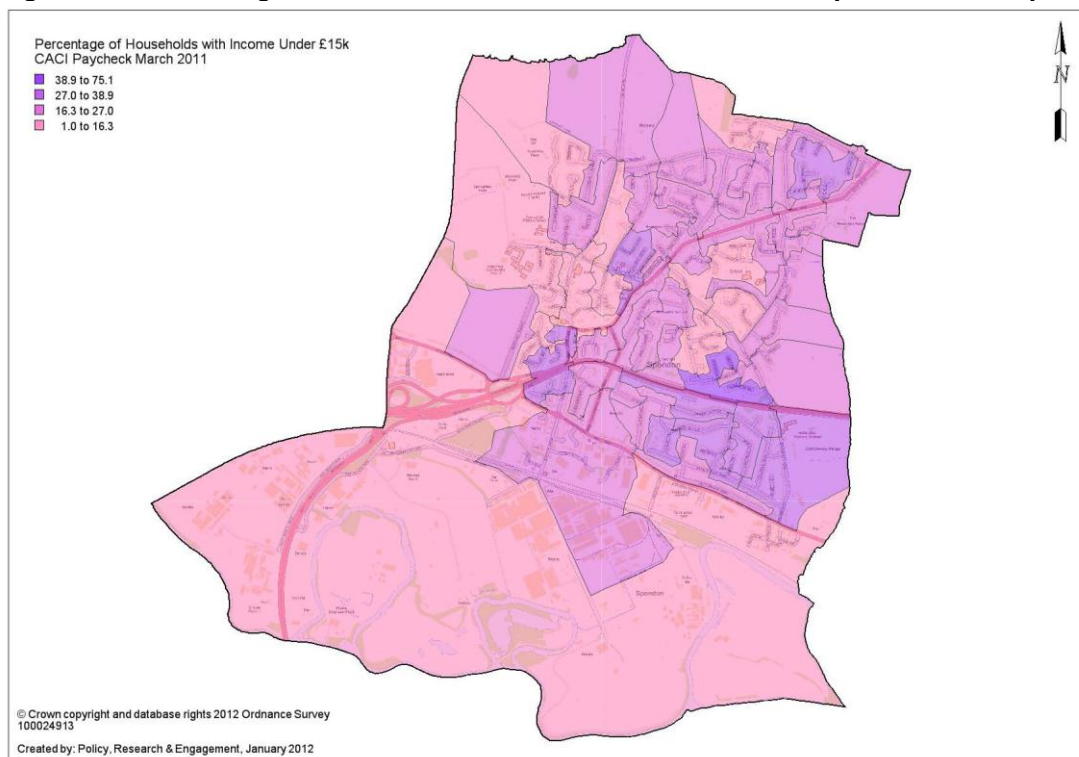

Figure 11: Mean Income by Output Area (OA), CACI Paycheck 2011

The percentage of households in Spondon with an annual income under £15k is lower than that of the city average and that of the East Midlands average.

Again, to the east of the ward off Ladybower Road there are areas with higher levels of mean annual income under £15k (see over).

Figure 12: Percentage of Households with Income Under £15k by OA, CACI Paycheck 2011

Indices of Multiple Deprivation 2010 – Income Domain

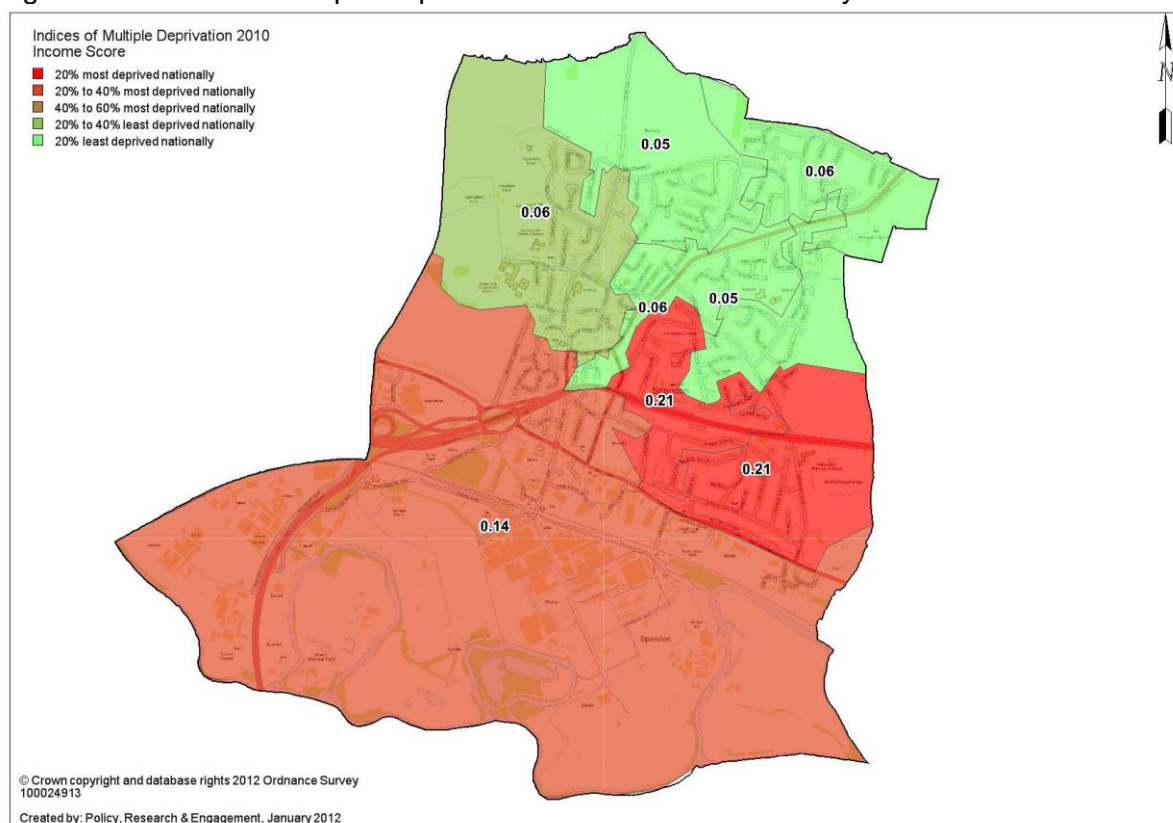

Five indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- Adults and children in income support family
- Adults and children in income-based Jobseeker's Allowance families
- Adults and children in Pension Credit (Guarantee) families
- Adults and children in certain Child Tax Credit families
- Asylum seekers receiving subsistence/accommodation support.

Derby is ranked the 62nd most deprived local authority out of 326 in the Income domain. Spondon is among the 40% to 60% most deprived wards in the country and is ranked the 5th least deprived of all Derby wards.

Two LSOA's in Spondon are in the most deprived 20% nationally. These LSOA's are in the east of the ward; off of the A52 around Arnhem Terrace and the Recreation Ground (see over).

Figure 13: Indices of Multiple Deprivation 2010 Income Domain by LSOA

Less Carbon Emissions from Industry and Transport

This will be measured via AEA and available only at city level.

Travel to work²⁵

The proportion of residents travelling to work from Spondon by car and van is above average, whilst the proportion travelling by bus is similar to the city average. The proportion travelling to work on foot is below average.

Distance Travelled to Work²⁶

42% of the working population work within 5 kilometres of the ward boundary, which is well below the city average of 56%. A further 6% of the working population work from home.

Approximately 30% of the working population travel between 5 and 10 kilometres compared to the city average of approximately 15%. This would suggest that residents of Spondon tend to travel further to work than residents of other areas of the city.

Congestion

Nottingham Road suffers from localised congestion during peak traffic periods, particularly at the junction with Chaddesden Lane and approaches to the A6005 Derby Road/Acorn Way junction.

²⁵ Census 2011. Copyright@ONS.gov.uk

²⁶ 2001 Census – this will be available for 2011 at a later date

The A52 suffers from congestion problems during peak traffic periods. Compared to other radial routes into the city the A52 suffers from medium levels of delay with particular problems approaching the A5111 (T) Interchange, Pride Park off slip and Pentagon Island.

More Good Quality Affordable Housing

The measure is currently under development and will be signed off shortly and it should be available at ward level.

Housing Tenure

The 2011 Census identified that owner occupied property in the area is over 15% more prevalent than across the city as a whole and makes up almost 79% of all housing stock. The percentages for all different types of rented property across Spondon is much lower than the city average for all sectors. Derby Homes properties are concentrated in and around the Asterdale Estate.

Housing Composition

The rate of Married or same-sex civil partnership couple: No children, one person pensioner and one family all pensioner are much higher in Spondon than the Derby average.

Spondon has a lower rate of other household all student, one household other and one person other than the Derby average. A breakdown can be seen in the chart below.

Figure 14: Comparison of Housing Composition between Spondon and Derby²⁷

²⁷ ONS Census 2011. Copyright@ONS.gov.uk

Housing Types

The 2011 Census identified that whole house or bungalow; semi-detached forms the largest proportion of households in Spondon. Whole house or bungalow; terraced and flat, maisonette or apartment; purpose built are under-represented in the area.

Figure 15: Comparison of Housing Types between Spondon and Derby²⁸

House Prices²⁹

Spondon had the sixth lowest volume of house sales of all wards in Derby in 2010 and the average house sale price was approximately 2.5% lower than the Derby average.

House price to income ratios in Spondon are approximately 4.3:1, compared to a city average of 4.4:1.

Table 7: Number of House Sales in Spondon 2010 and Average House Sale Price compared to Derby

Spondon Total Number of House Sales 2010	Derby Total Number of House Sales 2010	Spondon Average House Sale	Derby Average House Sale
126	2,597	£138,479	£141,906

Housing Condition³⁰

There are fewer non-decent private sector dwellings in Spondon when compared to the city average as well as less in disrepair, although those lacking modern facilities is comparable to the Derby average.

²⁸ ONS Census 2011. Copyright@ONS.gov.uk

²⁹ Housing Intelligence for East Midlands, Land Registry House Sales 2010

³⁰ Housing Intelligence for East Midlands, House Condition Surveys using Housing Health and Safety Rating System (HHSRS), Derby 2006

Empty Properties³¹

Spondon has considerably fewer long-term empty properties than the Derby average.
Indices of Multiple Deprivation 2010 – Barriers to Housing and Services Domain

Seven indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- Road distance to a GP
- Road distance to a supermarket or convenience store
- Road distance to a primary school
- Road distance to a post office
- Overcrowding
- Housing Affordability
- Homelessness.

Derby is ranked the 273rd most deprived local authority out of 326 in the Barriers to Housing and Services domain. Spondon is among the 20% least deprived wards in the country and is ranked the 5th least deprived of all Derby wards.

No LSOA in Spondon is in the 60% most deprived nationally.

³¹ Data from Council Tax database as at 14/02/12

Achieving their Learning Potential

Introduction

Nationally, the Government is working to tackle the number of young people not in education, employment or training (NEETs). For example, it is supporting thousands of apprenticeships up to degree equivalent. In Derby, libraries are working with Jobcentre Plus to provide job clubs to help local people get into employment. The Council's Adult Learning Service provides a range of courses and is aiming to increase the participation in adult learning.

Infrastructure

Schools

There are four primary schools in the ward: Asterdale Primary, Borrow Wood Primary, Springfield Primary and St Werburgh's Church of England Primary.

There is one secondary school: West Park Community and this recently became an Academy school.

School Capacity³²

This information is correct as of January 2012.

School catchment areas do not always align with neighbourhoods or ward boundaries and therefore schools may serve a wider area than the neighbourhood they are based in.

All four of the primary schools in Spondon had a surplus of places in 2012.

The only secondary school in the ward had a shortfall of 2%.

Table 8: Capacity of Spondon Schools with Surplus and Shortfall Percentages 2012

Primary	Number on Roll	Net Capacity	Surplus %	Shortfall %
Asterdale Primary	169	210	20%	0%
Borrow Wood Primary	362	420	14%	0%
Springfield Primary	137	206	33%	0%
St Werburgh's Church of England Primary	305	315	3%	0%
Secondary				
West Park Community (Academy)	1,273	1,250	0%	2%

³² DCC – CYP Directorate – School Organisation and Provision

Adult Education Colleges

There are no adult education colleges in Spondon. There is however one in the adjoining ward of Alvaston at the First Steps Centre.

Derby Plan

More Adults Learning

This will be measured via Derby Plan Survey although confidence levels will not be very high for ward level information.

Better Results in Primary Schools

Key Stage 2³³

Spondon has a higher percentage achieving Level 4 and above in English and Mathematics compared to the Derby average.

Early Years³⁴

Spondon has a much higher percentage achieving 78 points across the Early Years Foundation Stage Profile (EYFSP) than the Derby average.

Attainment

Key Stage 4³⁵

Spondon has a higher percentage achieving 5+ A* - C including English and mathematics when compared to the Derby average.

Not in Education, Employment or Training (NEET)³⁶

Spondon has a NEET figure slightly higher than the city average and has the eighth highest of all of Derby's wards.

Table 9: Comparison between ward NEET and City

Spondon NEET ³⁷	City NEET
8.7%	8.0%

³³ Performance and Improvement, Chief Executive's Office, DCC May 2012

³⁴ Performance and Improvement, Chief Executive's Office, DCC May 2012

³⁵ This analysis excludes Landau Forte Academy and non maintained schools

³⁶ Connexions Derbyshire, November 2011 Snapshot

³⁷ Note: The Derby NEET figure is the official Department for Education (DfE) figure. Ward figures are locally produced estimates. Both DfE and local calculated figures are residency based.

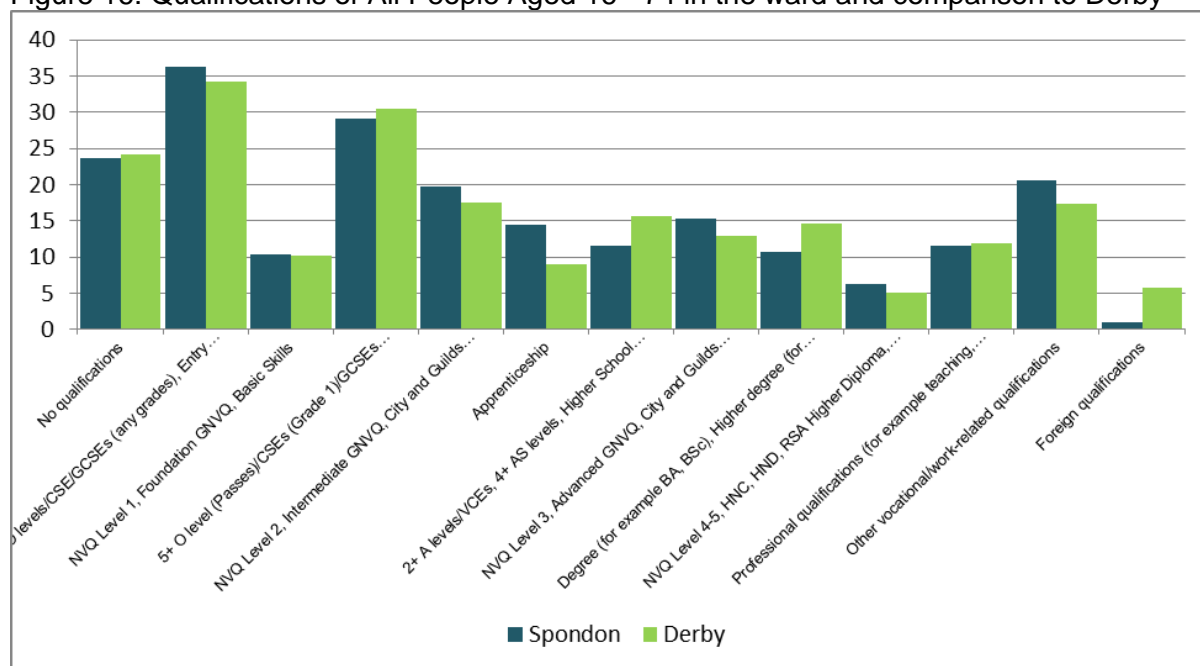

More Qualifications Among Adults

This will be measured via NOMIS but will not be available at ward level.

Qualifications of All People Aged 16 – 74³⁸

The 2011 census showed that there were a comparable percentage of people in Spondon with no qualifications to the Derby average.

Figure 16: Qualifications of All People Aged 16 - 74 in the ward and comparison to Derby³⁹

Indices of Multiple Deprivation 2010 – Education, Skills and Training Domain

Seven indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- KS2 Attainment
- KS3 Attainment
- KS4 Attainment
- Secondary School Absence
- Staying on in Education
- Entry to Higher Education
- Adult Skills.

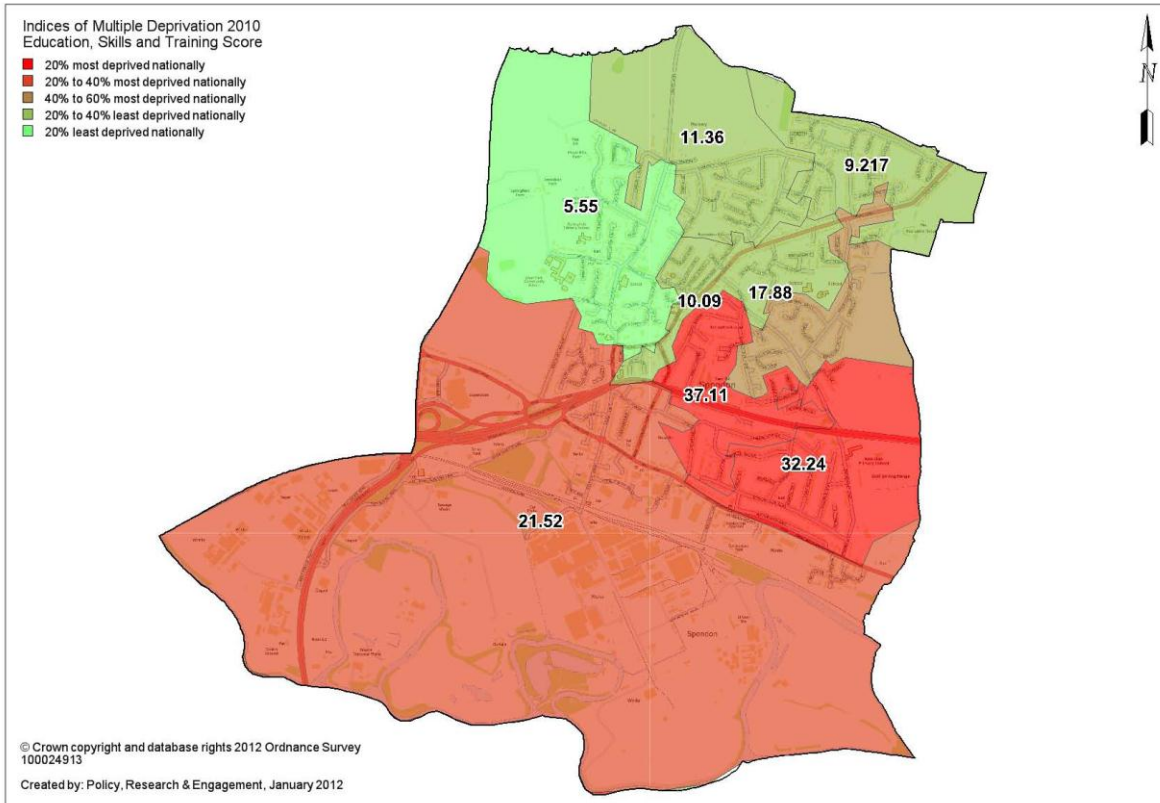

Derby is ranked the 78th most deprived local authority out of 326 in the Education, Skills and Training domain. Spondon is among the 40% to 60% most deprived in the country and is ranked the 10th most deprived of all Derby wards.

Two LSOA's in Spondon are in the most deprived 20% nationally. These LSOA's are in the east of the ward; off of the A52 around Arnhem Terrace and the Recreation Ground.

Figure 17: Indices of Multiple Deprivation 2010 Education, Skills, Training Domain by LSOA

Good Health and Well-Being

Introduction

The Health and Social Care Act 2012 has heralded significant changes in the health system. Clinical Commissioning Groups – led by GPs – will be responsible for the majority of the health budget. Further, responsibility for public health is moving from the NHS to local government. The Act also required the establishment of Health and Wellbeing Boards and development of local Health and Wellbeing Strategies (HWbS). In Derby, a Health and Wellbeing Board has been in place for 18 months, and the priorities of the Health and Wellbeing Strategy were agreed by the Board in May 2012.

One of the functions of the Health and Wellbeing Board will be to implement and monitor the health and wellbeing aspects of The Derby Plan (Sustainable Community Strategy). As a designated outcome board of Derby City and Neighbourhood Partnership (DCNP), members must take into account the DCNP Agreement and particularly its requirements regarding implementation of The Derby Plan and delivery back to their own organisations.

Infrastructure

While specific services may not always be present in certain Wards, access to primary care in Derby has always been seen as a strength of the local health system; with a network of services in the heart of communities. The following list highlights the primary care services that can be found in this Ward:

GP Practices

Chapel Street Medical Centre; Derwent Valley Medical Practice.

Pharmacies

Asda Pharmacy; Housley Pharmacy; Lloyds Pharmacy.

Dental Practices

Chapel Street Dental Practice; Spondon Dental Practice.

Optometrists

Asda Stores Ltd; Mark Davis Opticians.

Care Homes

Aspen Court Nursing Home; St Werburgh's House Nursing Home; The Laurels Nursing Home; Willowcroft (Methodist Homes for the Aged).

Derby Plan

Specific indicators are in the process of approval for the 'Good Health and Well-being' domain of the plan. It should be noted that whilst a variety will be available at a city level, there is currently limited availability for measures at a small area geography; for instance, covering aspects of workplace and Mental Health. The four themes of this element of the Derby Plan (prioritised within the HWbS), are:

1. *More people living longer in better health*
2. *Better health at work*
3. *Better mental health and well-being*
4. *More choice and influence over services.*

The Government wants people to have more choice and influence over the services they receive. This is known as personalisation. In Derby, adult social care is changing to give residents more choice and control over the support they receive. Through 'Personal Budgets', support is personalised so that residents have more involvement. While specific indicators have not yet been signed off, it should be noted that every indicator presented in the Ward health profile will influence people living longer in better health in the city.

Health Profile

The health profile overleaf shows how the health of individuals in this neighbourhood compare with the rest of Derby, as well as England (where available). The Ward's outcome in each measure is shown as a coloured circle, while the average for Derby is marked by a black line making up the 'spine' of this chart. The range of outcomes for all Wards in Derby are highlighted by a grey bar.

Where the outcome is illustrated by a red circle, this means that the outcome in this measure is significantly worse than seen across the city. An amber circle signifies an outcome that is comparable to the Derby average, and while a green circle signifies a significantly better outcome; it should be noted that this may still indicate an important public health issue for Derby. Outcomes that are highlighted by a clear circle denote a measure where no significance can be calculated, or where it might not be appropriate to signify a 'better' or 'worse' outcome.

Data sources, timeframes and values i.e. whether a rate, ratio or proportion, can be found in appendix 8 of this document.

For more information about the national Health Profiles programme, please visit the Association of Public Health Observatories (APHO) website via this link: <http://www.apho.org.uk/default.aspx?RID=49802>. Alternatively, Local Authority employees can access the DORIS Report Library, and then follow the following sequence of links: Adults, Health and Housing > Key Statistics > Health. The 2011 national Health Profile for Derby as well as an informative local briefing of the programme is available for use.

Ward Health Summary compared with Derby City

- Spondon Ward is one of Derby's more deprived neighbourhoods.
- While the rate of mortality for a number of big causes is relatively comparable to not only the average for Derby, but England also; life expectancy for females is significantly less than average for the city. Females in Spondon Ward are expected to live on average, less than nearly 9 years than in the least deprived neighbourhoods of Derby.
- There are significantly fewer Excess Winter Deaths in Spondon. Such deaths can be an indication of fuel poverty and energy efficiency in housing.
- The proportion of children immunised against Diphtheria, Tetanus, Polio and Hib is significantly fewer than average, and the national target of 95%. After clean water, vaccination is the most effective public health intervention in the world for saving lives and promoting good health.
- Spondon has one of the smallest proportions of child obesity in Reception Year (4-5 year old) children at 3.6%, compared to an average 9.7% in Derby, and 13.8% in the worst performing Ward.
- Teenage pregnancy is less of an issue in this neighbourhood.
- The rate of attendance to A&E made by residents of this Ward is significantly less than average, and Spondon has the smallest proportion of unnecessary A&E attendances. That being said, every third person to visit A&E from Spondon would be more appropriately seen in a primary care setting; in particular by their GP.
- While not significantly, there are higher than average admissions due to substance misuse in Spondon. These are however, small in number. Alcohol and drug abuse costs the government some £38 billion a year.

Health and wellbeing is determined by many factors, for example; Lifestyle e.g. diet, alcohol consumption, and levels of exercise. For example, individuals who are obese increase their risk of developing heart disease by 46%, while in those who are physically inactive the risk is increased by 37%. In fact, many diseases and cancers are easily preventable through adopting healthier lifestyle behaviours.

Wider determinants; such as poverty, employment, education, housing and hereditary traits will also determine the overall health and wellbeing of a population. Similarly, many of these factors are positively influenced by good health and wellbeing.

As such, any measure, whether currently performing positively or negatively, needs to be understood in the context of others. For instance, whether a mother chooses to breastfeed her baby will impact upon the health of mother and child, and the child's risk of developing problems such as Type 2 Diabetes, high blood pressure and cholesterol; which in turn will increase that child's risk in adulthood of heart disease or having a Stroke; which could consequently result in premature mortality.

Ward Area Health Profile

March 2012

Key:

- Significantly better than Derby average
- Not significantly different
- Significantly worse than Derby average
- No significance can be calculated

	38 Unnecessary A&E attendances	1083	33.8	39.0	43.7		33.8

Indices of Multiple Deprivation 2010 – Health Deprivation and Disability Domain

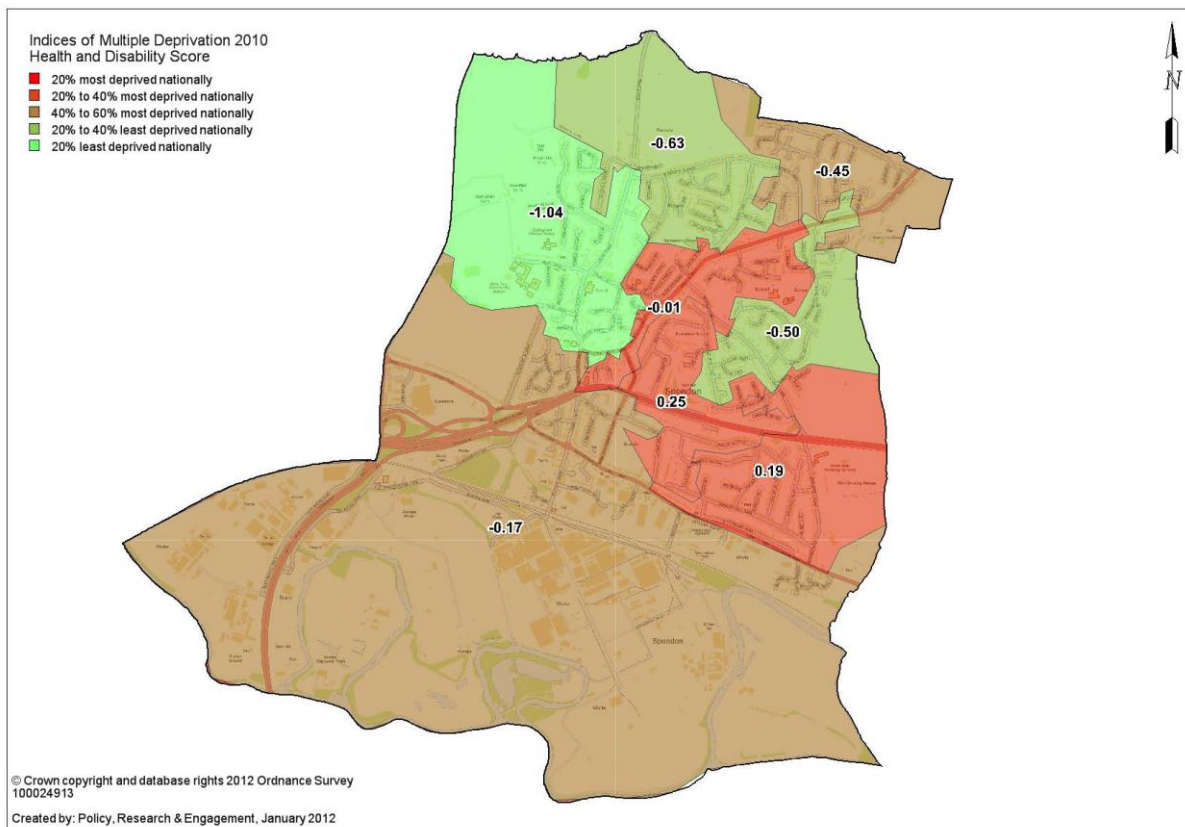

Four indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- Years of Potential Life Lost – an age/sex standardised measure of premature death
- Comparative Illness and Disability Ratio – an age/sex standardised measure of morbidity and disability
- Measures of acute morbidity – an age/sex standardised rate of emergency admissions to hospital
- Proportion of adults under 60 suffering from mood or anxiety disorders – a modelled indicator for the proportion of adults suffering from mood or anxiety disorders.

Derby is ranked the 126th most deprived local authority out of 326 in the Health Deprivation and Disability domain. Spondon is among the 40% to 60% most deprived wards in the country and is ranked the 12th most deprived of all Derby wards.

No LSOA's in Spondon are in the most deprived 20% nationally however two LSOA's in the east of the ward; off of the A52 around Arnhem Terrace and the Recreation Ground and one around Sitwell Street/Moor Street are in the 20% to 40% most deprived nationally.

Figure 18: Indices of Multiple Deprivation 2010 Health and Disability Domain by LSOA

Introduction

Partnership working is at the heart of community safety in the city, with the responsible authorities⁴¹ working together to reduce crime, disorder, anti-social behaviour and substance misuse. Derby City and Neighbourhood Partnerships within Derby City Council acts as the statutory Community Safety Partnership for the city to enable effective partnership working in these areas.

From November 2012, Police and Crime Commissioners will be elected in the city. They will replace the Police Authority and will have responsibility for managing the Force and Community Safety Budget, setting the police and crime priorities for the area and for holding the Chief Constable to account.

Infrastructure

Police

Spondon is covered by the Derby North Policing Section and there is a Community Police Office on Sitwell Street.

Spondon ward is covered by the Chaddesden and Spondon Safer Neighbourhood Area (see appendix 9 for a map).

Chaddesden and Spondon Safer Neighbourhood Team (SNT) is made up of one Police Sergeant, four Police Constables (PC), three Police Community Support Officers (PCSO) and one Special Constables (SC).

The Safer Neighbourhood Team also holds a drop in surgery.

Neighbourhood Watch⁴²

There are 195 neighbourhood watch groups in Derby, 18 of which are in Spondon ward.

Domestic and Sexual Violence

The Domestic and Sexual Violence Advocate team cover the whole of Derby and provide support, advice and information to victims of domestic and sexual violence, forced marriage and honour based violence, stalking and harassment; working in partnership with the police, health services, housing providers as well as local third sector organisations to try to ensure the safety of victims and their families.

⁴⁰ The micro-charts in the Being Safe and Feeling Safe section show most recent eight quarters as well as high and low point over those eight quarters. Individual crimes also show Derby ward average for the quarter.

⁴¹ In Derby City the Responsible Authorities are: Derbyshire Constabulary, Derbyshire Fire and Rescue, Derbyshire Probation Services, Derbyshire Police Authority, NHS Derby City, Derby City Council

⁴² Community Safety, Derbyshire Constabulary

Crime Prevention

A Crime Prevention Team operates across the city, primarily providing a service for Derby Homes tenants and victims of burglary, installing security locks etc and providing expert advice on how to reduce the likelihood of becoming a victim of burglary as well as supporting those at risk of harm identified by the Domestic and Sexual Violence Unit and other vulnerable people.

Transport

At present decisions have not been made to changes to the transport infrastructure for the city and for ward specific issues. These will be available later in the year and will be included in future profile updates.

Community Safety Team

There is a Community Safety Team operating throughout the city. They work with partners to respond to complaints of ASB and use a wide range of tools and powers to positively change the behaviour of offenders and provide support for victims.

Derby Plan

Less Harm Caused by Alcohol – National Indicator (NI) 20

NI20, while not an actual measure of harm caused by alcohol is a good proxy measure for alcohol related violence and its links to the Night Time Economy and public place violence.

The number of assaults with less serious injury decreased slightly from 53 incidents in 2010 compared to 49 in 2011 and the figure remains considerably lower than the Derby average.

Less Injuries and Harm to Vulnerable Children and Adults

Measure is currently under development and will be signed off shortly

Traffic Casualties⁴³

Spondon saw no traffic collision fatalities and when compared to the Derby average there were a lower number of serious collisions, slight collisions, Killed and Seriously Injured (KSI) and collisions involving children.⁴⁴

A map highlighting road injury collision locations can be found in appendix 11.

Less Fear of Crime and Anti-Social Behaviour

This will be measured via Derby Plan Survey although confidence levels will not be very high for ward level information.

According to the Derby CSP 2008 Survey a considerably lower number (0.00) of Spondon residents felt that ASB was an issue in their neighbourhood when compared to the city.

⁴³ DCC – Traffic Management and Road Safety

⁴⁴ See Appendix 3 Indicator Data numbers of collisions

Anti-Social Behaviour (ASB)

The number of ASB Calls for Police Service (CFS)⁴⁵ in 2011 saw a reduction on the previous year and the figure remains considerably lower than the Derby average.

Less Crime

This will be measured via British Crime Survey (BCS) comparator crimes or the monthly crime statistics

The 446 BCS comparator crimes⁴⁶ in 2011 was comparable to the 2010 figure and remains considerably lower than the Derby average.

Indices of Multiple Deprivation 2010 – Crime Domain

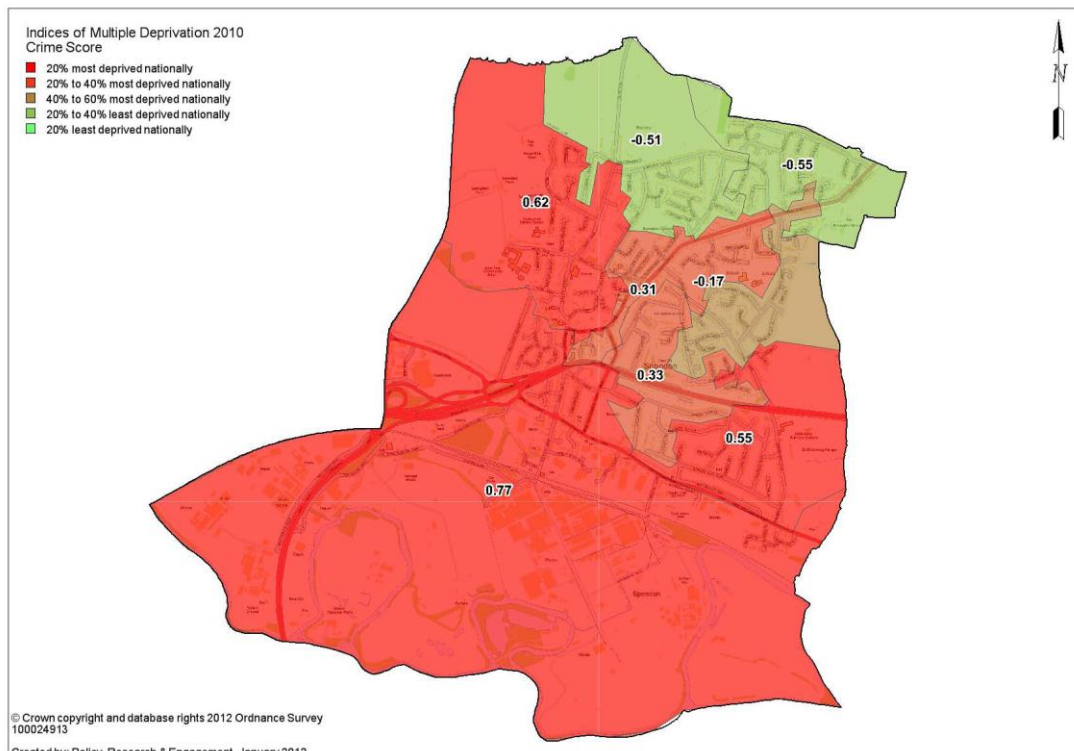

Seven indicators are used to calculate this domain of the overall Indices of Multiple Deprivation 2010. They are:

- Recorded crime rate for burglary
- Recorded crime rate for violence
- Recorded crime rate for theft
- Recorded crime rate for criminal damage.

Derby is ranked the 89th most deprived local authority out of 326 in the Crime domain. Spondon is among the 20% to 40% most deprived in the country and is ranked the 11th least deprived of all Derby wards.

Only two LSOA's in Spondon are not in the 60% most deprived nationally and these are to the north around Sancroft Avenue/Sancroft Road and Huntley Avenue.

Figure 19: Indices of Multiple Deprivation 2010 Crime Domain by LSOA

⁴⁵ These are calls to the Police requesting assistance and one CFS does not necessarily equal one incident. ASB issues are also reported directly to the Community Safety Team and raised at neighbourhood boards/forums

⁴⁶ For a full list of crimes see appendix 10

Youth Offending⁴⁷

The number of young offenders from Spondon in the Youth Offending Service (YOS) increased in 2011 when compared to the previous year but the figure is lower than the Derby average.

Table 10: Number in YOS and comparison to Derby ward average

	Spondon 2010	Spondon 2011	Percentage change	Derby Ward av. 2010/11
Number in YOS	31	43	+38.7%	70

⁴⁷ CYP, Youth Offending Information System (YOIS) Case Management System – data cut taken 08/02/12

A Strong Community

Introduction

The Government's policy agenda is heavily focused around decentralisation and localism. The Big Society is about transferring power from central Government to local communities. In addition, the Localism Act gives new rights and powers for communities and individuals. In Derby, neighbourhood boards and forums give local people the opportunity to discuss local needs and concerns with councillors, police and the fire service.

Infrastructure

Community Centres

Spondon has one community centre; the Spondon Village Hall Community Centre on Sitwell Street (see appendix 12 for a map of Derby community centres).

Neighbourhood Forums

Spondon holds four neighbourhood forums per financial year, two of them held at Spondon Village Hall and the venue for the other two is still to be confirmed.

Voluntary Groups

At the end of June 2012 the Community Action Derby database had 707 voluntary organisations in their database who stated they operated within Derby and its wards. Of those, 15 operate solely for residents in and around Spondon ward providing a wide variety of services.

Less Household Carbon Emissions

Since August 2011 the Council has been working with Apex Carbon Solutions Ltd on the Warmstreets for Derby Scheme which offers private householders and private tenants free or discounted loft and cavity wall insulation. The Scheme is funded through the Fuel Suppliers' Carbon Emissions Reduction Target obligation and is scheduled to run until the end of 2012.

Derby Homes, mainly through its fuel supplier/generator funded Community Energy Saving Programme, has installed in Derby (up to the end of December 2011):

- 257 solid wall insulations (internal drylining)
- 76 cavity wall insulations
- 1,207 loft insulations
- 792 new central heating systems.

From October 2012 the Council will be aiming to work in partnership to promote the Government's new Green Deal and Energy Company Obligation initiative. The Green Deal

will allow consumers and businesses to make energy efficiency improvements to their properties without upfront costs. The Energy Company Obligation underpins the delivery of the Green Deal and replaces the existing Carbon Emissions Reduction Target (CERT) and the Community Energy Saving Programme (CESP).

Derby Plan

More People Volunteering

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

According to the Derby CSP 2008 Survey a considerably lower rate of Spondon residents had given unpaid help to groups, clubs or organisations when compared to the city figure.

Table 11: Percentage who have given unpaid help to any groups, clubs or organisations in the past 12 months compared to the city.⁴⁸

	Spondon	City	Difference to city
Percentage who have given unpaid help to any groups, clubs or organisations in the past 12 months.	7.20	20.18	-64.32%

Library Volunteering

Between April 2011 and December 2011 19.25 hours were volunteered to Spondon library, the second lowest of all Derby libraries.

More People Influencing Local Decisions

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

The CSP 2008 Survey found that Spondon has a higher rate of residents who feel they can influence decisions affecting their local area.

Electoral Turnout⁴⁹

The turnout in Spondon for the 2011 local election was just over 10% higher than the Derby figure and it showed an increase on the 2008 election.

The polling districts to the north of the Borrowash by-pass/A52 have a higher electoral turnout than those to the south of it.

⁴⁸ Derby Community Safety Partnership Survey 2008

⁴⁹ DCC Electoral Services

People Attending Forums and Boards

Spondon has a higher average attendance at the neighbourhood forums than the city average.

Community Engagement/Empowerment

According to the Derby CSP 2008 Survey a lower percentage of Spondon residents had been involved in decision making groups or had been a councillor when compared to the city figure.

Table 12: Percentage of people who have been involved in decision making groups or have been a councillor⁵⁰

	Spondon	City	Difference to city
Percentage of people who have been involved in decision making groups or have been a councillor	0.53	3.00	-82.22%

More People Feel They Belong to Their Neighbourhood

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

Spondon has a higher rate of people who feel they very strongly/fairly strongly belong to their local neighbourhood when compared to the city figure.

Communication

According to the Derby CSP 2008 Survey a higher rate of Spondon residents felt well informed about what is being done to improve their local area when compared to the city figure.

More People Feeling that People from Different Backgrounds Get on Well Together

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

According to the Derby CSP 2008 Survey a slightly lower percentage of Spondon residents definitely/tend to agree that their local area is a place where people from different backgrounds get on well when compared to the city figure.

⁵⁰ Derby Community Safety Partnership Survey 2008

Table 13: Percentage who definitely/tend to agree that their local area is a place where people from different backgrounds get on well together compared to the city⁵¹

	Spondon	City	Difference to city
Percentage who definitely/tend to agree that their local area is a place where people from different backgrounds get on well together	68.80	70.37	-2.23%

Less Household Carbon Emissions

Measure is currently under development and will be signed off shortly.

Warm Streets

It will not be possible to obtain ward based information around Warm Streets as only the general postcode is recorded.

Green Scheme

This will be starting in October and should be measurable next year.

⁵¹ Derby Community Safety Partnership Survey 2008

An Active, Cultural Life

Introduction

By hosting the Olympic and Paralympic Games the Government hopes to inspire a new generation to play sport; encourage community sports participation and increasing participation in physical activity across the whole population, with a particular focus inspiring on young people. People being more physically active also contributes towards the government's objectives in reducing obesity and the health agenda?

In Derby, the Council's Leisure Facilities Strategy is the biggest legacy from the Olympic Games. Two large iconic sporting 'hubs' will be the centre of the proposed sports facilities, which will be complemented by 4 satellite facilities in each of the 4 geographic locations of the city. Other smaller community facilities are based across the city.

Derby has a unique heritage and culture and saw the world's first factory and in Arboretum, England's first public park as well as being home to the world's largest collection of Joseph Wright's paintings. Derby also hosts a number of regionally and nationally recognised festivals and events.

Infrastructure

Facilities

There is no leisure centre in Spondon or its neighbouring wards.

Brunswood Close Recreation Ground, Gravel Pit Lane Recreation Ground and the Dale Road public open space provide the major open space within the area, all serving a neighbourhood level catchment (see figure 1 - the map includes open spaces).

Spondon has a library on Sitwell Street which from 23rd January 2012 opens for 26 hours per week.

Cultural Activity

Participation in cultural activity is also enabled through one off and recurring events in Derby. Alongside headline city centre events such as Derby Feste, many smaller and more community focussed events happen throughout the city.

Due to many of these events being non ticketed and community led it is not always possible to accurately track participation. They do however provide opportunity for many thousands of people to participate in cultural activity. It is therefore an intention to implement methods of gathering this information for inclusion within neighbourhood profiles in future years.

Derby Plan

More People Taking part in Cultural Activities

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

Spondon has a lower rate of people who have attended a museum or art gallery in the last 12 months when compared to the city figure.

Table 14: Percentage who have attended a museum or art gallery in their local area at least once in the last 12 months⁵²

	Spondon	City	Difference to city
Percentage who have attended a museum or art gallery in their local area at least once in the last 12 months	11.47	18.26	-37.20%

Library Services

There were 430 new members registered in 2010/11.

In 2010/11 Spondon library saw 56,455 user visits and 60,937 book loans.

Spondon had a lower than average percentage of loans to children than the over all city figure' lower only than the Central Library.

Table 15: Percentage of books loans to children 2010/11 and comparison to Derby

% Spondon Loans to Children ⁵³	% Loans to Children (all libraries)
26.5	32.4

The customer satisfaction figure was higher than that of the city figure.

Table 16: Customer Satisfaction 2010/11 and comparison to Derby

Spondon Customer Satisfaction 2010/11	Overall Customer Satisfaction 2010/11
95%	89%

More People Taking Part in Physical Activities

This will be measured via the Derby Plan Survey. Confidence levels however will not be very high for ward level information but figures will provide an indication of the feeling in Spondon. The results for this should be available shortly and will be included in the next update of the profiles.

⁵² Derby Community Safety Partnership Survey 2008

⁵³ November 2011

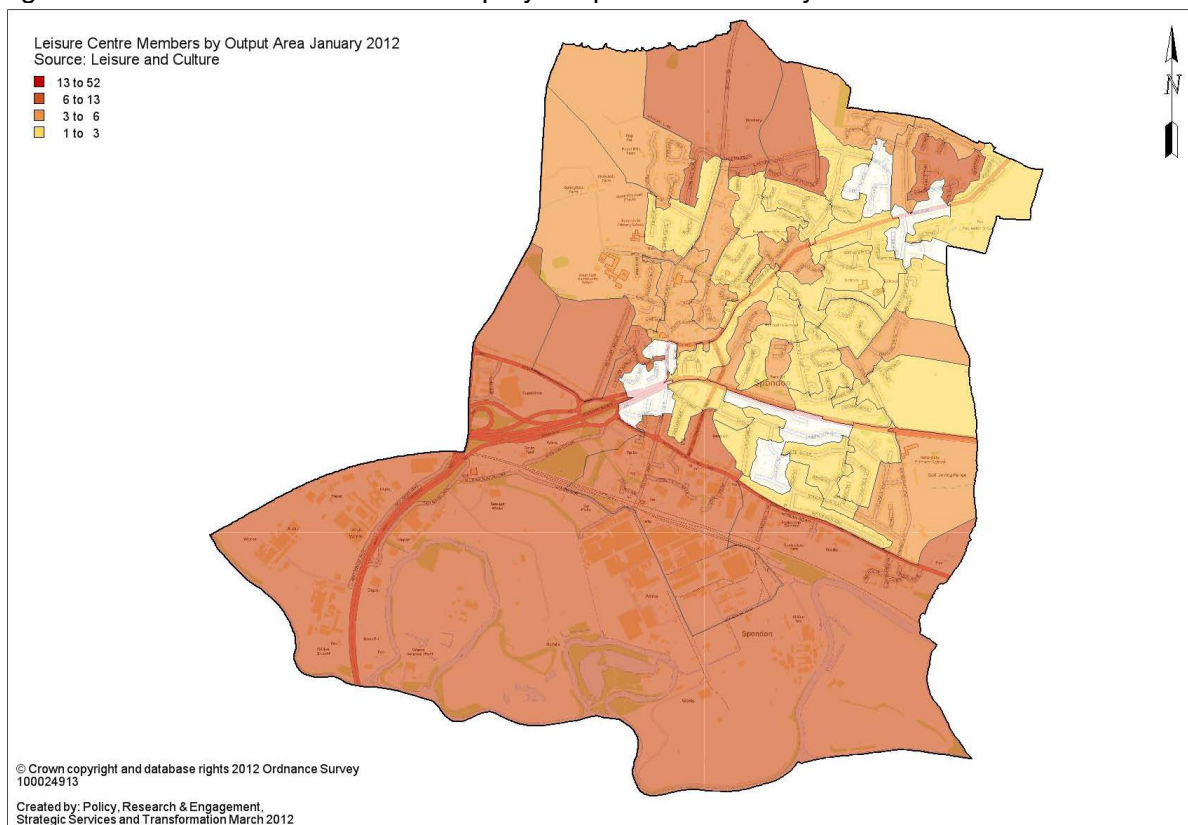

Physical Activities

The proportion of year 4 students attending schools within Spondon and achieving 7 hours of moderate physical activity a week is slightly below average. However, the proportion of pupils achieving the same target in years 8 and 10 is above the city wide level.⁵⁴

Sports centre membership

There are 114 members of Derby City Council leisure centres in Spondon; the eighth lowest of all wards; this may be affected by distance from a gym. Higher numbers of members are located to the south of Nottingham Road and in the north around Sancroft Avenue (see over).⁵⁵

Figure 20: Leisure Centre Membership by Output Area January 2012

⁵⁴ Physical Activity DCC data, Active People and b-active Local Public Service Agreement (LPSA) data derived on a school by school basis

⁵⁵ This section applies to gym membership only and not to casual attendance. Attendances to all leisure centres are much higher totalling 1,175,361 across the city between 1 January and 31 December 2011 and is broken down as follows:

- Moorways Sports Centre 257,563
- Moorways Swimming Pool 325,125
- Queens Leisure Centre 323,666
- Shaftesbury Sports Centre 21,478
- Springwood Leisure Centre 247,529

30990 : Manufacture of other transport equipment nec
32500 : Manufacture of medical and dental instruments and supplies

Appendix 6 – Definitions for Childcare Types

Home child carer

A home based child carer is a nanny that has registered with Ofsted and will have training in the common core skills for looking after children, had an enhanced CRB check and met other requirements such as holding an appropriate first aid qualification. Nannies are registered on the Voluntary Childcare Register (VCR) will also hold Public Liability Insurance.

Childminders and Network Childminders

Childminders are registered by Ofsted to look after children in their own home. Childminders have different skills and experiences, but all childminders will hold a relevant childminding qualification such as Introduction to Childminding Practise and a Paediatric First Aid certificate. Childminders typically work from 8.00am to 6.00pm, but some offer longer days and most are flexible about hours children attend. Some childminders offer places over the weekend and some offer overnight care.

Day nurseries

Day nurseries vary in size from small individual privately owned nurseries to nurseries run by large national companies, they will be registered with Ofsted. They usually open at 8.00am, sometimes earlier and close at around 6.00pm and usually open most weeks of the year; part-time places are often available. Nurseries generally cater for children 0-5 years old but some do offer out of school places.

Pre-school playgroups and Extended Pre-school Playgroups

Pre-school playgroups provide an opportunity for young children aged 2 – 5 years to be cared for in a group setting on a sessional basis, usually for three hours in the morning or afternoon during term time. They are often run by Parent Committees as non-profit making groups and are generally registered with Ofsted. Parents/carers do not have to stay with their children however; some parents do stay to help out at the sessions.

Maintained Nursery Schools and Units

Most nursery units and nursery schools are part of the local authority education system (maintained sector) and most are free (excluding meals and trips.) Some are run by private schools and they charge fees although you may be able to access a funded 3 or 4 year old place with them. Nursery units are part of primary schools or independent schools. Nursery schools are separate schools that run independently under the Local Authority. Nursery classes and nursery schools provide early education for 3 and 4 year olds, some provide childcare as well in the form of before school, after school or holiday schemes. Nursery schools and classes are likely to close for school holidays of at least 13 weeks in the year unless they offer a holiday scheme.

Out of school childcare

Out of school services are for mostly available for primary school age children to play and learn and have fun in groups. Some clubs do take older children and care for children in age grouped rooms. They are usually based in or near schools. Some groups are managed by volunteer management committee's with parents playing an active part in the management of the club whilst other groups are privately owned.

- **Before school clubs** (sometimes referred to as breakfast clubs) – open in the morning before school starts, usually from around 8.00 am. Most offer children the opportunity to enjoy breakfast with friends and some will offer other activities.
- **After school clubs** – usually from the time school ends to about 6.00pm. Children are collected either by bus or club staff collect the children and walk them safely to the club.
- **School holidays** - run in the school holidays and sometimes on in service/teacher training days, usually between 8.00 am and 6.00 pm. often part time sessions are also available.

Crèche

Crèches are generally provided within another 'setting' i.e. to accompany adult learning courses. Generally they will care for children aged 6 months to 8 years for short periods of time, some are Ofsted registered.

Appendix 8 – Ward Area Health Profile - Sources and Definitions

Ward Area Health Profile

Sources & Definitions

	Indicator	Measure	Period	Source
Birth and Mortality	1 Birth rate (aged 11-49 years) [best/worst not applicable]	Rate per 1,000 females aged 11-49 years	2010	Public Health Birth File (PHBF)
	2 Infant mortality rate (under 1 year)	Rate per 1,000 live births	2005-2010	PHBF
	3 All age all cause mortality rate	Directly age-standardised rate per 100,000	2008-2010	Public Health Mortality File (PHMF)
	4 Premature mortality rate from Cancer	Directly age-standardised rate per 100,000 under 75 yrs	2008-2010	PHMF
	5 Premature mortality rate from CVD	Directly age-standardised rate per 100,000 under 75 yrs	2008-2010	PHMF
	6 Premature mortality rate from Chronic Respiratory Disease	Directly age-standardised rate per 100,000 under 75 yrs	2008-2010	PHMF
	7 Premature mortality rate from Chronic Liver Disease	Directly age-standardised rate per 100,000 under 75 yrs	2008-2010	PHMF
	8 Excess Winter Deaths	Ratio of expected deaths based on non-winter deaths	Aug 2007 - Jul 2010	PHMF
	9 Life expectancy - Males	Life expectancy for boys from birth	2005-2009	Exeter patient register and PHMF
	10 Life expectancy - Females	Life expectancy for girls from birth	2005-2009	Exeter patient register and PHMF
Health protection	11 MMR immunisation (by age 2 years)	% uptake	2010/11	TPP: SystmOne (Child Health System)
	12 Diphtheria, Tetanus, Polio, Hib immunisations (by age 2 years)	% uptake	2010/11	TPP: SystmOne
Deprivation	13 Index of Multiple Deprivation (IMD) 2010	IMD Score	2010	Department for Communities and Local Government
	14 Health Deprivation & Disability Domain	Weighted Score	2010	DCLG
	15 IDAOP	Weighted Score	2010	DCLG
Health improvement	16 Low birth weight births (<2500g)	Percentage of total births	2010	PHBF
	17 Obese children (age 4-5 yrs)	Percentage of measured children	2010/11	National Child Measurement Programme (NCMP)
	18 Obese children (aged 10-11 yrs)	Percentage of measured children	2010/11	NCMP
	19 Teenage conception rate (age under 18 years)	Rate per 1,000 females aged 15-17	2008-2010	TPP: SystmOne
	20 Adults smoking	Synthetic prevalence (%) estimate	2010	Experian's Mosaic Public Sector: British Household Panel Survey (BHPS)
	21 Binge drinking adults	Percentage of the adult (16+) population	2007-2008	Association of Public Health Observatories - Estimates of Adults' Health and Lifestyles
	22 Hospital admissions due to alcohol specific conditions	Directly age-standardised rate per 100,000	2010/11	Hospital Episode Statistics (HES)
	23 Hospital admissions due to substance misuse	Directly age-standardised rate per 100,000	2010/11	HES
	24 Healthy eating adults	Percentage of the adult (16+) population	2006-2008	APHO - Estimates of Adults' Health and Lifestyles
Prevention of ill health	25 Smoking in pregnancy	Percentage of total births	2008/09 - 2010/11	Derby Hospitals NHS Foundation Trust maternity dataset
	26 Breastfeeding initiation	Percentage of total births	2008/09 - 2010/11	DHFT maternity dataset
	27 Breastfeeding at 6wks	Percentage of total births	2008/09 - 2010/11	TPP: SystmOne
	28 Emergency hospital admissions for all causes	Standardised Admission Ratio (SAR)	2010/11	HES
	29 Hospital (emergency) admissions for stroke	Standardised Admission Ratio (SAR)	2008/09 - 2010/11	HES
	30 Hospital (emergency) admissions for CVD	Standardised Admission Ratio (SAR)	2008/09 - 2010/11	HES
	31 Hospital (emergency) admissions due to injury (<18 years)	Rate per 10,000	2010/11	Secondary Uses Service (SUS)
	32 Hospital (emergency) admissions due to injury (>18 years)	Rate per 10,000	2010/11	SUS
	33 Hospital (emergency) admissions due to self-harm	Standardised Admission Ratio (SAR)	2008/09 - 2010/11	HES
	34 Hospital (emergency) admissions for COPD	Standardised Admission Ratio (SAR)	2008/09 - 2010/11	HES
	35 Hip fracture in 65s and over	Directly age-standardised rate per 100,000	2008/09 - 2010/11	HES
	36 A&E attendances (<18 years)	Rate per 1,000	2010/11	SUS
	37 A&E attendances (>18 years)	Rate per 1,000	2010/11	SUS
	38 Unnecessary A&E attendances	Percentage HRG coded as V08, of total A&E attendances	2010/11	SUS

Appendix 10 – British Crime Survey Comparator Crimes

Bicycle theft
Burglary
Common Assault
Interfere with Vehicle
Robbery
Theft from person
Theft From Vehicle
Theft of Vehicle
Vandalism (criminal damage)
Wounding

The survey does not aim to provide an absolute count of crime and has notable exceptions, including homicides and incidents against those living in communal establishments or people who are homeless.

The main BCS count of crime also does not include fraud, sexual offences or drug use. However, these are covered in additional modules within the survey and are reported on separately.

Appendix 13 - Glossary of Terms

Directly age-standardised rates

These are rates where the underlying figures have been standardised to take account of the age and sex structure of the population, allowing comparisons between areas with different population sizes and demography. For this piece of work this means that these rates can be compared across different wards regardless of differing populations. A high rate reveals problems, such as high number of people dying prematurely or conversely, small numbers of deaths. Rates are less robust when small numbers are involved.

Lower Layer Super Output Areas (LSOA)

LSOAs were created for the 2001 census and contain approximately 600-750 households on average. Importantly within the LSOA the households have similar characteristics.

British Crime Survey

The survey does not aim to provide an absolute count of crime and has notable exceptions, including homicides and incidents against those living in communal establishments or people who are homeless.

The main BCS count of crime also does not include fraud, sexual offences or drug use. However, these are covered in additional modules within the survey and are reported on separately.

The BCS Comparator Crimes are bicycle theft, burglary, common assault, interfere with vehicle, robbery, theft from person, theft from vehicle, theft of vehicle, vandalism (criminal damage) and wounding.

Confidence Interval (CI)

A CI gives an estimated range of values which is likely to include an unknown population parameter, the estimated range being calculated from a given set of sample data.⁶¹

Confidence Level (CL)

A CL is a measure of the reliability of a result. A CL of 90 per cent means that there is a probability of at least 90 per cent that the result is reliable

Indices of Multiple Deprivation

The English Indices of Deprivation 2010, Communities and Local Government states that “The English Indices of Deprivation 2010 use 38 separate indicators, organised across seven distinct domains of deprivation which can be combined, using appropriate weights, to calculate the Index of Multiple Deprivation 2010.

This is an overall measure of multiple deprivation experienced by people living in an area and is calculated for every Lower Layer Super Output Area (LSOA) in England. The IMD

⁶¹ STEPS statistics glossary

2010 can be used to rank every LSOA in England according to their relative level of deprivation.

The English Indices of Deprivation are a continuous measure of relative deprivation therefore there is no definitive point on the scale below which areas are considered to be deprived and above which they are not.“
